The Drone Age Michael J. Boyle, 2020 Over the last decade the rapid pace of innovation with drone technology has led to dozens of new and innovative commercial and scientific applications from Amazon drone deliveries to the patrolling of national parks with drones But what is less understood is how the spread of unmanned technology will change the patterns of war and peace in the future Will the use of drones produce a more stable world or will it lead to more conflict Will drones gradually replace humans on the battlefield or will they empower soldiers to act more precisely and humanely in crisis situations How will drones change surveillance around the world and at home The Drone Age traces the rise of unmanned technology and how it is reshaping our world The spread of drones is reordering geopolitical fault lines and providing new ways for states to test the nerves and strategic commitments of their rivals Drones are also allowing terrorist groups like the Islamic State to take to the skies and to level the playing field against their enemies Across the world the low financial cost of drones and the reduced risks faced by pilots is making drone technology an essential tool for militaries peacekeeping forces and even private companies From large surveillance drones to insect like micro drones unmanned technology is revolutionizing the way that states and non state actors compete with each other and is providing game changing benefits to those who can most rapidly adapt unmanned technology to their own purposes Yet peacekeeping and humanitarian organizations are also utilizing drones too An essential guide to a surprisingly complex disruptive force in world politics The Drone Age shows how the mastery of drone technology will become central to the ways that governments and non state actors seek power and influence in the coming decades

The implications of cuts to the BBC World Service Great Britain: Parliament: House of Commons: Foreign Affairs Committee, 2011-04-13 The Foreign Affairs Committee believes the BBC World Service is of such value to the nation that its income should be ring fenced against spending cuts The Service has suffered a disproportionate reduction in its future Grant in Aid under the spending review settlement by comparison with that of the core FCO allowing for inflation 16% as against 10% across the four years 2010 11 to 2014 15 High level discussions between the Government and the BBC about a transfer of funding responsibility started only nine days before the formal announcement of the change The report says that the decision to reduce World Service spending by 16% during the 2010 spending review period should be reversed and resources made available for it to continue its operations at roughly the 2010 11 level of staffing and output If the Service's funding is reduced in spite of this recommendation the committee urges for damage limitation with an unreduced BBC Hindi and BBC China Mandarin shortwave service and enhanced resources to BBC Arabic as required by the recent and continuing political developments in the region Some of the activity of the World Service contributes to the wider aims of the Department for International Development and a transfer of just 0.35% of DFID's resource budget over the next three years would compensate for the proposed 16% reduction in World Service funding There is no reason why such a transfer should not be made if the political will to carry it out is present Shaping National Security Pawel

Nations Disaster Assessment and Coordination UNDAC the International Search and Rescue Advisory Group INSARAG the North Atlantic Treaty Organisation NATO and the Union Civil Protection Mechanism UCPM DRR programs While these entities versions of DRR best practices are largely directed at decreasing the impact of disaster hazards limiting relevant exposure local vulnerabilities increasing capacities to cope with disaster the authors present these frameworks as potential tools and effective means to support national security efforts This is especially important in disaster circumstances when local and national emergency resources may be insufficient to face hazards and multi hazards and result in cascading effects to occur as hazard events transpire Chapters present various resources available to them through these programs to encourage authorities from every country to effectively apply the mechanisms and emergency mechanisms specifically to offer domestic solutions Due to these programs proven track records in providing organisational standards the use of such mechanisms can serve as both the basis to foster sound DRR practices and by extension can supplement resiliency security and continuity within countries This concept is based on the premise that the UNDAC INSARAG NATO and ECPM emergency mechanisms have been developed to be implementable directly or indirectly in every country in the world when disasters occur Shaping National Security takes a big picture holistic view of DRR and national security to offer innovative ideas and solutions to professionals and officials working in disaster management disaster risk reduction emergency management crisis management civil protection public security management national security criminal justice international studies and homeland security

ISRAEL AGAINST ALL ODDS Christopher H. K. Persaud, 2019-07-19 The Jewish people have been and are indisputably the most persecuted people in the annals of history Today 53% of all hate crimes in the United States of America are directed at the Jewish People At the source of Jew hatred in its myriad forms is anti Semitism a sinister and vile mindset that has existed since Old Testament times or for thousands of years Anti Semites pervade social religious economic and political confines even mainstream Christianity and their dislike for people of Jewish ancestry often translate into mindless persecution and slaughter such as the atrocities perpetrated by the Nazis and their collaborators during the Second World War in the mid twentieth century whereby over six million Jews met their deaths in the Holocaust Anti Semitism instead of diminishing after the horrors of World War II showed no sign of abatement and it seems as though the entire world with a few exceptions like the Jewish nation of Israel itself and the United States of America is at loggerheads with Jews Even international peacekeeping and monitoring organizations like the United Nations and its numerous spinoff groups are known to discriminate sometimes barefacedly against Jews and Israel Middle Eastern Arabs and Muslims harbor intense loathing for Israel and Jews and notwithstanding their occupancy of over ninety nine percent of Middle Eastern territories seek to covet the less than one percent of land in which Israelis reside by any means necessary Despite the seemingly insurmountable hardships and challenges Jews have faced throughout the centuries they persist and even progress in today s societies They leave their enemies awe struck at their resilience and their will to survive It seems as though Israel and Jews in general enjoy

a kind of divine providence ISRAEL and Jews around the world continue to stand tall today against all odds
