Microbial Safety in Water Resources Pei-Ying Hong,Timothy R. Julian,Muhammad Raihan Jumat,2019-02-19 As more countries become water scarce alternative water sources like treated wastewaters will be used to meet the demands of the domestic agriculture and industrial sectors However the use of treated wastewater is only justified when it is without any detrimental impacts on public health food safety and water quality To minimize impacts well operated treatment plants are important barriers that reduce the amount of contaminants disseminated from wastewaters into the environment during reuse events Continuous accurate and comprehensive monitoring on our water further safeguards the public against potential risks This eBook looks into topics that close the knowledge gaps in these mentioned areas

Water Quality in Drinking Water Distribution Systems Mirjam Blokker,Joost Van Summeren,Vanessa Speight,2020-12-02 Safe drinking water is paramount for the health and wellbeing of all human populations Water is extracted from surface and groundwater sources and treated to comply with drinking water standards The water is then circulated through the drinking water distribution system DWDS Within the DWDS water quality can deteriorate due to microbiological growth chemical reactions interactions with ageing and deteriorating infrastructure

and through maintenance and repair activities Some DWDS actions may serve to improve water quality however these can adversely impact the drinking water system and cause instances of poor water quality or disease outbreaks We invited papers covering examinations of DWDS design and operational practices and their impact on water quality We received papers based on practical research in real DWDS and laboratory test facilities We also received papers on novel modelling approaches A wide range of water quality aspects was gathered including temperature disinfection bacterial communities and biofilm fecal contamination and QMRA and the effects of flushing and intermittent supply
