Tall buildings represent one of the most energy intensive architectural typologies while at the same time offering the high density work and living conditions that many believe will be an important constituent of future sustainable communities. How then can their environmental impact be lessened? This insightful book takes an overview of the tall building and its impacts looking at cityscape, place, mobility, microclimate, energy and economics, design principles and the development of the sustainable tall building from global perspectives covering North and South America, Europe, the Middle East and Asia. Detailed qualitative case studies of buildings in design and operation, the future for sustainable tall buildings. Not simply another showcase for future utopian designs and ideals, the information presented here is based on hard research from operating buildings. Highly illustrated and combining analysis with solid detail for practice, this is essential reading for architects, building engineers, design consultants, retrofitters and urban planners interested in or working with tall buildings and researchers, students in these disciplines.

Corporate Real Estate Asset Management Barry P. Haynes, Nick Nunnington, 2010. Real Estate is not only one of the most valuable assets for a business in terms of visual representation of the company but also one of the most costly assets. It is therefore important for those studying and practising in Real Estate and Property Management to know how to minimise costs and maximise profit in order to manage these assets efficiently. Corporate Real Estate Management considers the commercial property market from the perspective of the business occupier, offering contemporary solutions to problems and innovative and inspiring added value action plans. **What Colour is your Building?** David Clark, 2019-07-25.
