decades in the development of geospatial data and tools that describe locations of objects on the Earth's surface and make it possible for anyone with access to the Internet to witness the magnitude of a disaster. However, the effectiveness of any technology is as much about the human systems in which it is embedded as about the technology itself. *Successful Response Starts with a Map* assesses the status of the use of geospatial data tools and infrastructure in disaster management and recommends ways to increase and improve their use. This book explores emergency planning and response, how geospatial data and tools are currently being used in this field, the current policies that govern their use, various issues related to data accessibility and security, training and funding. *Successful Response Starts with a Map* recommends significant investments be made in training of personnel, coordination among agencies, sharing of data and tools, planning and preparedness, and the tools themselves.

Behold the Man Peter S. Williams, 2024-06-18 After a substantial new essay examining the nature of a properly skeptical historical inquiry into Jesus of Nazareth in the context of contemporary worldviews from pre-modernism to meta-modernism, *Behold the Man* presents revised essays on an eclectic range of issues: from how the Epistle of James treats Jesus as Divine within decades of the crucifixion and an evaluation of recent arguments about the dating of the Fourth Gospel to debunking claims about Jesus and ancient aliens and furthering debate about the resurrection. With a foreword by eminent New Testament scholar Craig L. Blomberg and extensive recommended resources, *Behold the Man: Essays on the Historical Jesus* represents a wide-ranging interdisciplinary engagement with historical Jesus studies.
