Accumulating Insecurity Shelley Feldman, Charles C. Geisler, Gayatri A. Menon, 2011 *Accumulating Insecurity* examines the relationship between two vitally important contemporary phenomena a fixation on security that justifies global military engagements and the militarization of civilian life and the dramatic increase in day to day insecurity associated with contemporary crises in health care housing incarceration personal debt and unemployment Contributors to the volume explore how violence is used to maintain conditions for accumulating capital Across world regions violence is manifested in the increasingly strained often terrifying circumstances in which people struggle to socially reproduce themselves Security is often sought through armaments and containment which can lead to the impoverishment rather than the nourishment of laboring bodies Under increasingly precarious conditions governments oversee the movements of people rather than scrutinize and regulate the highly volatile movements of capital They often do so through practices that condone dispossession in the name of economic and political security

Accumulation by Dispossession and Local Livelihood Insecurity La Ring, 2018 Credit Constraints, Political Instability, and Capital Accumulation Risto Herrala, Rima Turk Ariss, 2013-12-16 We investigate the complex interactions between credit constraints political instability and capital accumulation using a novel approach based on Kiyotaki and Moore's 1997 theoretical framework Drawing on a unique firm level data set from Middle East and North Africa MENA empirical findings point to a large and significant effect of credit conditions on capital accumulation and suggest that continued political unrest worsens credit constraints The results support the view that financial development measured by a relaxing of financial constraints is key to macroeconomic development

Land Tenure Insecurity, Credit Rationing and Household Asset Accumulation Pedro V. Olinto, 1997 **Keynes's General Theory and Accumulation A.**

Asimakopulos, Athanasios Asimakopulos, 1991-06-28 This book makes Keynes's writing on his General Theory accessible to students by presenting this theory in a careful consistent manner that is faithful to the original Keynes's theory continues to

be important because the issues it raised such as the problems of involuntary unemployment the volatility of investment and the complexity of monetary arrangements in modern capitalist economies are still with us Keynes s method of analysis which tries to allow for the complications of dealing with historical time deserves the careful attention given in this book Keynes s formal analysis dealt only with a short period of time during which changes in productive capacity as a result of net investment were small relative to initial productive capacity Roy Harrod and Joan Robinson were the two most prominent followers of Keynes who attempted to extend his analysis to the long period by allowing for the effects of investment on productive capacity as well as on effective demand The careful examination of their writings on this topic is a natural complement to the presentation of Keynes s General Theory and makes clear the severe limitations on any use of equilibrium concepts in dealing with accumulation in models that try to observe Keynes s warnings about an unknowable future in the type of world we inhabit

Africa and the Global System of Capital Accumulation Emmanuel O Oritsejafor, Allan D. Cooper, 2021-04-17 Africa and the Global System of Capital Accumulation offers a groundbreaking analysis of the strategic role Africa plays in the global capitalist economy The exploitation of Africa s rich resources as well as its labor make it possible for major world powers to sustain their authority over their own middle class populations while rewarding African collaborators in leadership positions for subjecting their populations into poverty and desperation Middle class obsessions such as computers mobile phones cars and the petroleum that fuels them diamonds chocolate all of these products require African resources that are typically obtained by child or slave labor that helps to generate billionaires out of foreign investors while impoverishing most Africans Oritsejafor and Cooper demonstrate that primitive accumulation believed by both Adam Smith and Karl Marx to be a process that precedes capitalism is actually an integral part of capitalism They also validate the thesis that capitalism incorporates racism as an organizing tool for the exploitation of labor in Africa and on a global scale Case studies are presented on Nigeria Cote d Ivoire Ghana Liberia Congo Tanzania Somalia Angola Namibia Sao Tome and Principe and South Sudan There are also chapters analyzing the interests of Russia and China in Africa This book will be of interest to students and scholars of African politics development and economics

David T. Harje,1972 Routledge International Handbook of Rural Studies Mark Shucksmith,David L. Brown,2016-05-20 Rural societies around the world are changing in fundamental ways both at their own initiative and in response to external forces The Routledge International Handbook of Rural Studies examines the organisation and transformation of rural society in more developed regions of the world taking an interdisciplinary and problem focused approach Written by leading social scientists from many countries it addresses emerging issues and challenges in innovative and provocative ways to inform future policy This volume is organised around eight emerging social economic and environmental challenges Demographic change Economic transformations Food systems and land Environment and resources Changing configurations of gender and rural society Social and economic equality Social dynamics and institutional capacity Power and governance Cross cutting these challenges are the growing interdependence of rural and urban the rise in inequality within and between places the impact of fiscal crisis on rural societies neoliberalism power and agency and rural areas as potential sites of resistance The Routledge International Handbook of Rural Studies is required reading for anyone concerned with the future of rural areas

Economic Instability and Stabilization Policy Ralf Pauly,2021-04-30 This book pleads for a new orientation of government economic policy as well as central bank policy rejecting the traditional government stabilization policy that leads to a dead end of economic instability and social inequality in the long run Growing economic instability and increasing state stabilization characterize the development of the capitalist market economy since the major world economic crises of the last century The book examines these crises and the measures states take to overcome them Additionally it addresses the effectiveness and consequences of state intervention In presenting the main features of Keynes and Minsky s macroeconomics the book provides a conceptual basis for an outlook on government stabilization in a changing market economy It thus also offers a suitable framework for current economic policy discussions Finally the book examines the wider context of economic history for lessons to be learned This book is a must read for scholars and students of economics as well as policy makers and practitioners interested in a better understanding of macroeconomics central bank policy and the results of state intervention *Transecting Securityscapes* Till F. Paasche,James Derrick Sidaway,2021-12-15 *Transecting Securityscapes* is an innovative book on the everyday life of security told via an examination of three sites Cambodia the

Kurdistan region of Iraq and Mozambique The authors study of how security is enacted differently in these three sites taking account of the rich layers of context and culture enables comparative reflections on diversity and commonality in securityscapes In *Transecting Securityscapes* Till F Paasche and James D Sidaway put into practice a diverse and contextual approach to security that contrasts with the aerial big picture view taken by many geopolitics scholars In applying this grounded approach they develop a method of urban and territorial transects combined with other methods and modes of encounter The book draws on a broad range of traditions but it speaks mostly to political geography urban studies and international relations research on geopolitics stressing the need for ethnographic embodied affective and place based approaches to conflict The result is a sustained theoretical critique of abstract research on geopolitical conflict and security mainstream as well as academic that pretends to be able to know and analyze conflict from above

Liberalization, Financial Instability and Economic Development Yılmaz Akyüz, 2014-05-01 Weighing up the costs and benefits of economic interdependence in a finance driven world this book argues that globalization understood and promoted as absolute freedom for all forms of capital has been oversold to the Global South and that the South should be as selective about globalization as the North Liberalization Financial Instability and Economic Development challenges the orthodoxy on the link between financial deepening and economic growth as well as that between the efficiency of financial markets and the benefits of liberalization Ultimately the author urges developing countries to control capital flows and asset bubbles preventing financial fragility and crises and recommends regional policy options for managing capital flows and exchange rates

Non-State Challenges in a Re-Ordered World Stefano Ruzza, Anja P Jakobi, Charles Geisler, 2015-10-14 There is a sprawling scholarship on violence crime and corrupt state rule yet few have interpreted these challenges as transformative at the global scale and as a potential source of alternative non state legitimacy This volume challenges Westphalian conservatism in a provocative yet plausible manner shedding light at the ubiquity and diversity of unfolding non state agendas and at their effect on the imagined state community Focusing on civil war parties warlords commercial providers of security multinational companies and criminal organizations the book directs attention to theoretical questions and policy challenges arising from non state armed expansion To accomplish this the contributors present a range of case studies and comparisons within three thematic sections the first takes stock of how when and in what measure state and state system legitimacy are challenged by non state violent or criminal activity the second addresses the nature effectiveness and side effects of different state mandated reaction to non state activities and third focuses on the recombination of state and non state actors contributing to processes of socio political transformation This volume provides a current analysis of different armed and violent actors encroaching on the state s monopoly of violence It seeks to spark debate about global political change and will be of interest to students and scholars of global governance global security and international relations

The War on Terrorism and the American 'Empire' after the Cold War Alejandro Colas,Richard Saull,2007-04-11 This new study shows how the American led war on terror has brought about the most significant shift in the contours of the international system since the end of the Cold War A new imperial moment is now discernible in US foreign policy in the wake of the neo conservative rise to power in the USA marked by the development of a fresh strategic doctrine based on the legitimacy of preventative military strikes on hostile forces across any part of the globe Key features of this new volume include an alternative critical take on contemporary US foreign policy a timely accessible overview of critical thinking on US foreign policy imperialism and war on terror the full spectrum of critical view sin a single volume many of these essays are now contemporary classics The essays collected in this volume analyse the historical socio economic and political dimensions of the current international conjuncture and assess the degree to which the war on terror has transformed the nature and projection of US global power Drawing on a range of critical social theories this collection seeks to ground historically the analysis of global developments since the inception of the new Bush Presidency and weigh up the political consequences of this imperial turn This book will be of great interest for all students of US foreign policy contemporary international affairs international relations and politics

Fast Transverse Beam Instability Caused by Electron Cloud Trapped in Combined Function Magnets Sergey A. Antipov,2018-11-01 This thesis presents profound insights into the origins and dynamics of beam instabilities using both experimental observations and numerical simulations When the Recycler Ring a high intensity proton beam accelerator at Fermi National Accelerator Laboratory was commissioned it became evident that the Recycler beam experiences a very fast instability of unknown nature This instability was so fast that the existing dampers were ineffective at suppressing it The nature of this phenomenon alongside several other poorly understood features of the beam became one of the biggest puzzles in the accelerator community The author investigated a hypothesis that the instability arises from an interaction with a dense cloud of electrons accompanying the proton beam He studied the phenomena experimentally by comparing the dynamics of stable and unstable beams by numerically simulating the build up of the electron cloud and its interaction with the beam and by constructing an analytical model of an electron cloud driven instability with the electrons trapped in combined function dipole magnets He has devised a method to stabilize the beam by a clearing bunch which conclusively revealed that the instability is caused by the electron cloud trapped in a strong magnetic field Finally he conducted measurements of the microwave propagation through a single dipole magnet These measurements have confirmed the presence of the electron cloud in combined function magnets
