The ACE Programmer's Guide Stephen D. Huston, James C. E. Johnson, Umar Syid, 2003 This book analyzes the application of the legal principle of non discrimination in the context of energy network operation Since the early 1990s the duty not to discriminate has applied to energy network operators in order to achieve a liberalized European energy market in which European consumers have a free and real choice of energy supplier The book provides guidance to those working in the context of the non discrimination obligation such as energy network operators regulatory authorities national courts and other energy market players as well as those studying the rules for academic research purposes The book s conclusions serve as a tool for critical consideration and offer suggestions for improvements to the legal framework and its application on a European as well as a national level Several questions are answered including why energy network operators have a non discrimination obligation in the context of energy market liberalization how European law has tried to remove and control the discrimination problem since the early 1990s and when different treatment of energy network users amounts to forbidden discrimination The book s conclusions are underpinned by comparisons with competition law public procurement law and telecommunications law as well as a case study on how energy network operators and regulators in several Member States currently interpret and apply the non discrimination obligation Series Energy Law Vol 15 **The Ace and Aro**
