**Evidence in Anti-Doping at the Intersection of Science & Law** Marjolaine Viret, 2015-10-31 This book is a comprehensive practice oriented guide to the evidentiary regime under the 2015

World Anti Doping Code WADC including the functioning of the Athlete Biological Passport It is the first to show how the interplay between science and law affects the collection and evaluation of evidence in anti doping and how paradigm shifts in anti doping strategies may modify evidentiary assumptions implicit to the WADC regime Unique in its dealing with the subtleties of anti doping science and legal implications the book gives lawyers involved in anti doping the keys to a better understanding of the science underlying the WADC regime while providing anti doping scientists with the first reference material to understand the legal framework in which their activities are embedded The emphasis of the book is on international doping cases and it relies predominantly on CAS awards published up to Spring 2015 Written by an experienced Swiss lawyer it provides an insight into the Swiss legal system and its importance for the legal practice in doping matters Marjolaine Viret is an attorney at law in Geneva Switzerland specialising in sports and health law She has gained significant experience in sports arbitration as a senior associate in one of Switzerland's leading law firms She also holds positions within committees in sport in particular as a member of the UCI Anti Doping Commission Ms Viret had her doctorate on anti doping approved summa cum laude in 2015 She participates as a researcher in a project for a commentary of the 2015 WADC funded by the National Science Foundation and is regularly invited to lecture or speak in various fields of sports law The book appears in the ASSER International Sports Law Series under the editorship of Dr Dave McArdle Prof Dr Ben Van Rompuy and Marco A van der Harst LL M

**Food, Nutrition and Sports Performance III** Ronald J.

Maughan, Susan M. Shirreffs, 2013-08-21 As sport has become more professionalised over the last thirty years so the role of nutrition in promoting health and performance has become ever more important to athletes who search for the extra edge to succeed in their respective sports With the expansion in the provision of medical and scientific support services in elite sport those who advise athletes have had to become adept at identifying those dietary strategies that will help them to outperform their competitors This book is structured in two parts The first analyses the science that underpins the nutritional goals of athletes with a focus on the implications for athletes during training competition and recovery The second looks more closely at the practical implications for different sport categories i.e. those that focus on strength power or endurance and on weight category sports team sports and winter sports This volume will be of value to sports dietitians and nutritionists and others involved in the care and support of athletes as well as to those who take an interest in the subject of sport nutrition and competitive performance Coaches and athletes will also find much of interest here This book is based on the proceedings of the third in a series of Consensus Conferences in Sports Nutrition organised under the auspices of the International Olympic Committee It was published as a special issue of the Journal of Sports Sciences

Computational Intelligence in Sports

Iztok Fister, Iztok Fister Jr., Dušan Fister, 2018-12-17 This book presents recent research on computational intelligence CI algorithms in the field of sport In the modern age information technologies have greatly reduced the need for human effort in the carrying out of many daily tasks These technologies have radically influenced the lives of humans and the information

society in general Unfortunately these advances have brought with them certain negative effects including the encouragement of sedentary lifestyles and the attendant health problems such as obesity that these engender Other modern maladies chiefly cardiovascular disease diabetes and cancer have also been on the increase Today sports are virtually the only activity that still connects modern humans to their original lifestyle which was based on physical motion This book tears familiarizing sports scientists with the foundations of computational intelligence while at the same time presenting the problems that have arisen in the training domain to computer scientists Lastly the book proposes the use of an Artificial Sports Trainer designed to enhance the training of modern athletes who cannot afford the considerable expense of hiring a human personal trainer This intelligent system can monitor performance and design and direct appropriate future training thus promoting both healthy lifestyles and competitive success in athletes

**Sport Nutrition for Health and Performance** Melinda Manore, Nanna L. Meyer, Janice Thompson, 2009 The authors sort fact from fiction to help students and practitioners of sports nutrition present sound advice to athletes on correct nutrition and dietary requirements
