

History of Environmental Literature and Criticism

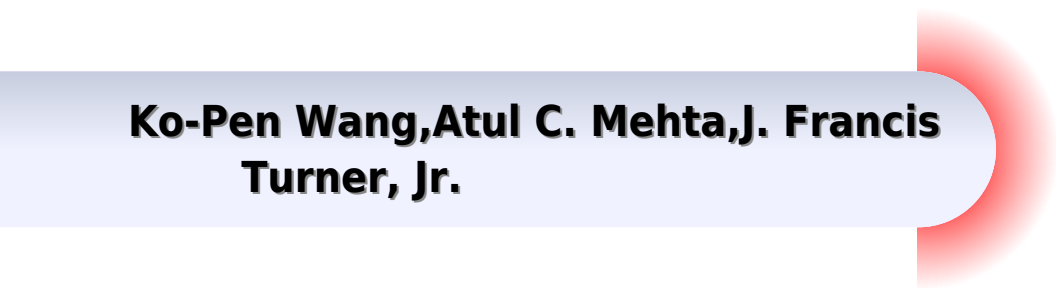

Environmental literature and criticism have evolved significantly over time, reflecting changing societal values and scientific understanding. The field encompasses a wide range of texts, from early nature writing to contemporary environmental activism.

The history of environmental literature is deeply intertwined with the development of environmental thought. Early works often focused on the beauty and grandeur of the natural world, while later texts increasingly addressed the impact of human activity on the environment. This evolution is reflected in the growing body of critical scholarship that seeks to understand the cultural and political contexts of environmental writing.
