,1903 *Waters of the World* Sarah Dry,2021-10-15 The compelling and adventurous stories of seven pioneering scientists
who were at the forefront of what we now call climate science From the glaciers of the Alps to the towering cumulonimbus
clouds of the Caribbean and the unexpectedly chaotic flows of the North Atlantic *Waters of the World* is a tour through 150
years of the history of a significant but underappreciated idea that the Earth has a global climate system made up of
interconnected parts constantly changing on all scales of both time and space A prerequisite for the discovery of global
warming and climate change this idea was forged by scientists studying water in its myriad forms This is their story Linking
the history of the planet with the lives of those who studied it Sarah Dry follows the remarkable scientists who summited
volcanic peaks to peer through an atmosphere's worth of water vapor cored mile thick ice sheets to uncover the Earth's
ancient climate history and flew inside storm clouds to understand how small changes in energy can produce both massive
storms and the general circulation of the Earth's atmosphere Each toiled on his or her own corner of the planetary puzzle
Gradually their cumulative discoveries coalesced into a unified working theory of our planet's climate We now call this field
climate science and in recent years it has provoked great passions anxieties and warnings But no less than the object of its
study the science of water and climate is and always has been evolving By revealing the complexity of this history *Waters of*
