Agricultural Policy Monitoring and Evaluation 2024 Innovation for Sustainable Productivity Growth OECD,2024-11-06

This annual report monitors and evaluates agricultural policies in 54 countries including the 38 OECD countries the five non OECD EU Member States and 11 emerging economies It finds that despite some modest declines in recent years support to agriculture has remained close to recent historical highs While changes in support have been limited agricultural policies have been both reactive and proactive boosting the sector s capacity to respond to current challenges while aiming to ensure that food systems are fit for purpose as future conditions evolve This year s report focuses on policies fostering sustainable productivity growth in agriculture Governments are applying a large variety of approaches to improve productivity while preserving natural resources and reducing agricultural greenhouse gas emissions The report notes however that clearly defined targets related to sustainable productivity growth and measurable indicators of progress are important to ensure that policies achieve their stated objectives The report also notes that making more effective use of producer support to promote innovation and environmental sustainability on the farm and refocusing overall support towards targeted R D can better leverage public spending to deliver public goods and sustainable productivity growth In line with the 2022 OECD Agriculture Ministerial Declaration the report identifies a seven point policy agenda for making agriculture more sustainable productive and resilient and for improving the effectiveness and efficiency of agricultural support and markets **The**

**Major Projects Report 2012** Great Britain: National Audit Office,2013-01-10 In respect of its largest defence projects there are early signs that the Ministry of Defence has begun to make realistic trade offs between cost time technical requirements and the amount of equipment to be purchased Nevertheless the continuing variances to cost and time show the MOD needs to do consistently better This report which gives a progress review of the 16 largest defence projects shows that in the last year there has been a total forecast slippage of 139 months and increase in costs of 468 million This means that since the projects were approved costs have increased by 6.6 billion around 12 per cent more than the planned cost and the projects have been delayed by 468 months taking almost a third longer than originally expected It would be unrealistic to expect MOD and industry to identify every risk at the start of technically challenging projects However the continuing problems indicate that MOD has more to learn from historic The MOD is accepting the capability risk and some wider costs resulting from these project delays and is having to make difficult decisions about long term capabilities The MOD has made a significant investment in new and upgraded helicopters to address the shortfall identified in the NAO s 2004 report The MOD has also spent 787 million on air transport and air to air refuelling aircraft to support current operations and address capability gaps such as those caused by the previously reported delays to the A400M transport aircraft However capability gaps remain

**The major projects report 2011** Great Britain: National Audit Office,2011-11-16 Action taken by the Ministry of Defence to balance its overall budget in the short term following the Strategic Defence and Security Review has contributed

to a near 500 million in year cost increase in the 15 largest defence projects When coupled with previous cost growth these projects are now 6 billion above forecasts made when the main investment decisions were taken For the third successive year central planning decisions taken by the Department including delaying various projects have had the biggest impact on cost growth accounting for 237 million of the increase Of this 113 million relates to decisions to enhance capability Macro economic factors such as adverse foreign exchange rates accounted for 176 million of the increase Cost overruns from project specific technical issues accounted for 53 million During 2010 11 there was a total increase of 30 months with an average two months per project in the forecast time to complete these projects and bring them into service This brings the total delay on all 15 projects to 26 8 years Long term cost analysis by the NAO has shown that the difference between the approved and forecast costs of all projects which have had their main investment decision approved since 2000 is 10 6 billion an 11 4 per cent increase Additional costs have been avoided by reducing the amount of equipment the Department originally planned to buy Had the Department not reduced equipment numbers cost growth could have been between 18 2 billion and 19 4 billion approximately 20 per cent above the approved costs IRS modernization continued progress requires addressing resource management challenges : testimony before congressional committees , Joint review of the strategic plans and budget of the Internal Revenue Service, 2005 United States. Opportunities this report focuses on groundwater and how its allocation can be improved in terms of economic efficiency environmental effectiveness and social equity Drawing on an analysis of groundwater s distinctive features and nine case studies of groundwater allocation in a range of countries the report provides practical policy guidance for groundwater allocation in the form of a health check This health check can be used to assess the performance of current arrangements and manage the transition towards improved allocation

**The major projects report 2010** Great Britain: National Audit Office,2010-10-15 Central departmental decisions by the Ministry of Defence to try to balance the defence budget have reduced its cash flow requirements in the short term but at a long term cost that represents poor value for money for the taxpayer Not making realistic budgetary provision for all likely project outcomes and slowing down projects has resulted in a 3 3 billion increase in a single year 2009 10 in the total cost of the 15 largest defence equipment projects For the second successive year the cost performance on the majority of projects has been broadly stable and the rate of timescale slippage has also reduced significantly since last year and 98 per cent of Key Performance Indicators are expected to be met The MOD did not make realistic budgetary provision for all potential costs for example on the Typhoon combat aircraft where the Department decided that it needed to spend 2 7 billion on the programme including the purchase of 16 additional aircraft to meet contractual agreements It has slowed down projects such as the Queen Elizabeth Class aircraft carriers leading to further project cost growth of 650 million And to address cost overruns the Department has also reduced the number of items and therefore capability to be procured The MOD recently undertook to report annually to Parliament on the affordability of its ten year equipment plan which should help deter the corporate practices which have adverse value for money implications

*Research Handbook on Climate Change Mitigation Law* Geert Van Calster,Wim Vandenberghe,Leonie Reins,2015-01-30 As well as taking stock of the current and

proposed legal instruments the book looks at the wider policy and economic aspects of coping with climate change It provides a comparative overview of key issues across Europe the United States Asia Pacific Consolidated Annual Appropriation Accounts for the Financial Year Ended ... Malawi,2003 *Divergent Democracy* Katherine Krimmel,2024-07-23 An innovative examination of the shift by American political parties toward issue based differentiation Recent Democratic and Republican party platforms display clear differences on such issues as abortion LGBTQ rights gun control and the environment These distinctions reflect a programmatic party system that is one in which policy positions serve as a key basis of electoral competition Yet party politics were not always so issue oriented the rise of policy positions as the dominant marker of party appeal occurred largely over the last fifty years In *Divergent Democracy* Katherine Krimmel examines this transformation of the American party system using innovative machine learning techniques to develop and present the first measure of party differentiation on issues since Democrats and Republicans began competing with each other in 1856 Why did the shift to issue based party competition take more than a century to materialize Krimmel offers a groundbreaking theory focusing on what aids and constrains parties abilities to do the difficult conflict ridden work of developing issue positions She argues that clientelistic subnational party organizations promising material support or jobs in return for votes long impeded programmatic partisanship while the growth of national party organizations facilitated it Moreover institutions and agents of racial oppression extended the life of nonprogrammatic practices as they attempted to shield discriminatory laws and institutions from interparty competition Following the civil rights revolution of the 1960s space opened for programmatic competition to grow Using both quantitative and qualitative tools Krimmel offers a vital view of the foundations of today s issue based party competition and its alternatives Essays on the Quality of Audited Financial Statements Ulf Mohrmann,2016-02-15 The dissertation consists of four essays on the quality of audited financial statements The first analysis investigates the association between several regulations of the audit market and earnings characteristics The second essay differentiates between different drivers of audit quality after an auditor change by comparing the effects of voluntary and mandatory auditor changes The third study analyses the different strategies of Big4 and non Big4 auditors in dealing with Level 3 fair values The fourth part examines banks valuation behavior concerning Level 3 fair values Financing the End-to-End Supply Chain Simon Templar,Erik Hofmann,Charles Findlay,2020-08-13 *Financing the End to End Supply Chain* provides readers with a comprehensive understanding of the financial synergies across the supply chain It demonstrates the importance of the strategic relationship between the physical supply of goods and services and the associated financial flows The book provides a clear introduction demonstrating the importance of the strategic relationship between supply chain and financial communities within an organization This book links together treasury banking supply chain systems IT and key stakeholders *Financing the End to End Supply Chain* will help senior supply chain practitioners to build collaboration improve relationships and enhance trust between supply chain partners With its combination of theory

and practice it tackles vital issues including physical information and financial flows and tailoring supply chain finance to individual organisations circumstances Recognizing that supply chain finance means different things in different countries the authors also consider various initiatives to harmonize and develop cross border financing as well as including an agenda for national and international policy makers The new edition features interviews from SCF platform providers on how ecosystems are involved in supply chain finance additional learning activities for students and new examples on working capital management
