Atlas Of Nevada Conifers Atlas Of Nevada Conifers:

Atlas of Nevada Conifers David Alan Charlet, 1996 Atlas of Nevada Conifers is a major scientific contribution to our understanding of the ecology of Nevada It documents in great detail the distribution of all native conifer species in the state critical information because of the primary ecological importance of conifers for all organisms and because of the lack of documentation of these distributions in the scientific literature before now Charlet maps and documents the exact location of herbarium records for 1 600 individual trees The data found in 23 tables and 22 range maps will serve as a primary reference for botanists land managers and conservation biologists for years to come

An Atlas of the World's Conifers Aljos Farjon, Denis Filer, 2013-11-11 A 2014 Choice Magazine Outstanding Academic Title An Atlas of the World's Conifers is the first ever atlas of all known conifer species It is based on locality information of ca 37 000 collected herbarium specimens held in scientific institutions As well as providing natural distribution maps for each species Farjon and Filer give the reader comprehensive insight into the biogeography diversity and conservation status of conifers on all continents dispelling the widely held view that they are primarily a northern boreal plant group Conifer diversity is analysed and presented with a taxonomic and geographic perspective Distribution patterns are interpreted using the latest information on continental drift dispersal and phylogeny The entire dataset supporting the Atlas can be consulted and verified online These data can also be used for further research and are an invaluable resource for anyone working on conifer systematics biogeography or conservation An Atlas of the World's Conifers indicates the known distribution of all conifers including an analysis of their biogeography diversity and conservation status Also available from Brill is Aljos Farjon's A Handbook of the World's Conifers published in 2010 ISBN 978 90 04 17718 5 which is a 2017 Choice Magazine Outstanding Academic Title

Conifers Aljos Farjon, 1999 Conifers are one of the world's most important resources of timber If managed wisely and used sustainably these resources will provide wood for a multitude of purposes virtually indefinitely Additional products include resins and their derivatives and even medicinal extracts for example taxol now used in the treatment of cancer Conifers occur on all continents except Antarctica Of the 630 species 355 are listed as of conservation concern with 200 or 25 of species threatened with extinction Although exploitation of these resources is as old as civilization this century has seen a dramatic increase in the exploitation of timber resources This action plan assess conifer diversity and its threats It is unique among IUCN's Plant Action Plans so far published in that it gives the complete global red list of conifers using the 1994 IUCN Red List Categories and criteria Data is analyzed to identify conifer hot spots where conservation should be a priority and a short list of threatened species is prioritized

Terrestrial Vegetation of California, 3rd Edition Michael Barbour, Todd Keeler-Wolf, Allan A. Schoenherr, 2007-07-17 This completely new edition of Terrestrial Vegetation of California clearly documents the extraordinary complexity and richness of the plant communities and of the state and the forces that shape them This volume is a storehouse of information of value to anyone concerned with meeting the challenge of understanding

managing or conserving these unique plant communities under the growing threats of climate change biological invasions and development Harold Mooney Professor of Environmental Biology Stanford University The plants of California are under threat like never before Traditional pressures of development and invasive species have been joined by a newly recognized threat human caused climate change It is essential that we thoroughly understand current plant community dynamics in order to have a hope of conserving them This book represents an important well timed advance in knowledge of the vegetation of this diverse state and is an essential resource for professionals students and the general public alike Brent Mishler Director of the University Jepson Herbaria and Professor of Integrative Biology University of California Berkeley

Mammal Community Dynamics Cynthia J. Zabel, Robert G. Anthony, 2003-09-18 Conservation of mammals in the coniferous forests of western North America has shifted in recent years from species based strategies to community and ecosystem based strategies resulting in an increase in the available information on mammalian communities and their management This book provides a synthesis of the published literature on the role of forest mammals in community structure and function with emphasis on their management and conservation In addition to coverage of some of the charismatic megafauna such as grizzly bears gray wolves mountain lions elk and moose the book also provides a thorough treatment of small terrestrial mammals arboreal rodents bats medium sized carnivores and ungulates The unique blend of theoretical and practical concepts makes this book equally suitable for managers educators and research biologists who will find it a valuable reference to the recent literature on a vast array of topics on mammalian ecology
