restrictive environments often using digital technology to amplify their voices and preserve cultural identity In various countries existing legislation greatly influences the implementation of cultural policies and sustainable development In Indonesia for example Law Number 5 of 2017 concerning Culture serves as the main foundation for the development of sustainable cultural policies This law promotes the protection preservation development utilization and fostering of culture as an integral part of national development Law Number 5 of 2017 concerning the Advancement of Culture n d Cultural Policy and Sustainable Development are interrelated concepts and are the main focus of this conference where appropriate cultural policies can strengthen sustainable development reinforce cultural identity and improve the quality of life for communities In the context of the conference theme Cultural Policies in Democratic and Nondemocratic Regimes it is important to consider the differences in cultural policy approaches between these two types of regimes This forum aims to facilitate communication among Law Faculty Academics worldwide with the agenda of the 1st International Conference on Cultural Policy and Sustainable Development ICPSD Cultural Policies in Democratic and Nondemocratic Regimes *Bank Regulatory Structure* United States. General Accounting Office,1995 **Rethinking Power Sector Reform in the Developing World** Vivien Foster,Anshul Rana,2019-12-05 During the 1990s a new paradigm for power sector reform was put forward emphasizing the restructuring of utilities the creation of regulators the participation of the private sector and the establishment of competitive power markets Twenty five years later only a handful of developing countries have fully implemented these Washington Consensus policies Across the developing world reforms were adopted rather selectively resulting in a hybrid model in which elements of market orientation coexist with continued state dominance of the sector This book aims to revisit and refresh thinking on power sector reform approaches for developing countries The approach relies heavily on evidence from the past drawing both on broad global trends and deep case material from 15 developing countries It is also forward looking considering the implications of new social and environmental policy goals as well as the emerging technological disruptions A nuanced picture emerges Although regulation has been widely adopted practice often falls well short of theory and cost recovery remains an elusive goal The private sector has financed a substantial expansion of generation capacity yet its contribution to power distribution has been much more limited with efficiency levels that can sometimes be matched by well governed public utilities Restructuring and liberalization have been beneficial in a handful of larger middle income nations but have proved too complex for most countries to implement Based on these findings the report points to three major policy implications First reform efforts need to be shaped by the political and economic context of the country The 1990s reform model was most successful in countries that had reached certain minimum conditions of power sector development and offered a supportive political environment Second countries found alternative institutional pathways to achieving good power sector outcomes making a case for greater pluralism Among the top performers some pursued the full set of market oriented reforms while others retained a more important role for the state Third reform efforts

should be driven and tailored to desired policy outcomes and less preoccupied with following a predetermined process particularly since the twenty first century agenda has added decarbonization and universal access to power sector outcomes The Washington Consensus reforms while supportive of the twenty first century agenda will not be able to deliver on them alone and will require complementary policy measures
