*Close Reading for the Twenty-First Century* Dan Sinykin, Johanna Winant, 2025-10-21 A user's guide to the fundamental practice of literary studies providing context examples and practical exercises Close reading making an argument based in close attention to a text is the foundation of literary studies This book offers a guide to close reading treating it as a skill that can be taught and practiced It first explains what close reading is what it does and how it has been used across theoretical schools ranging from affect studies to Black studies to queer theory to Marxism It then presents a series of master classes in the practice with original contributions by scholars from a range of different institutions Finally it provides practical materials worksheets and suggested activities for instructors to use in the classroom The tone throughout is encouraging and accessible inviting readers of all backgrounds to hone their craft The book divides the practice of close reading into five steps coining a term for each step scene setting noticing local claiming regional argumentation and global theorizing It traces the roots of close reading showing how it has spread far beyond its origins in practical criticism and New Criticism In twenty one short chapters contemporary scholars discuss close readings by such prominent literary critics as Erich Auerbach and Helen Vendler describing how their arguments work and how to achieve similar results An essential resource for instructors and students at the undergraduate level and beyond this book shows how understanding close reading can make us better readers thinkers and writers

**Munimenta Gildhallae Londoniensis** Riley, 1860 Current Trends In Theoretical Computer Science - Entering The 21st Century Gheorghe Paun, Grzegorz Rozenberg, Arto Salomaa, 2001-02-12 The scientific developments at the end of the past millennium were dominated by the huge increase and diversity of disciplines with the common label computer science The theoretical foundations of such disciplines have become known as theoretical computer science This book highlights some key issues of theoretical computer science as they seem to us now at the beginning of the new millennium The text is based on columns and tutorials published in the Bulletin of the European Association for Theoretical Computer Science in the period 1995 2000 The columnists themselves selected the material they wanted for the book and the editors had a chance to update their work Indeed much of the material presented here appears in a form quite different from the original Since the presentation of most of the articles is reader friendly and does not presuppose much knowledge of the area the book constitutes suitable supplementary reading material for various

**Admirals of the Eighteenth Century** John Creswell,2025-05-01 *British Admirals of the Eighteenth Century* 1972 examines the problems of eighteenth century naval warfare and differs in two important respects from orthodox opinions It shows that the belief that the fighting instructions of the eighteenth century were Admiralty orders which cramped the initiative of admirals has been disproved by documentary evidence and it argues that a study of the most important sea battles of the period indicates that the view that tactics at sea should always be based on principles which had been accepted as axiomatic in land warfare appears to have been misguided The book examines the tactical problems which faced some of the greatest admirals of the time and analyses how they dealt with them      **Transportation Equity Act for the 21st Century** United

States. Congress,1998      Purposeful Leadership for Africa in the 21st Century Lumkile Wiseman Nkuhlu,2024-09-16 Leaders of the African liberation movements proclaimed ambitious objectives and promised swift dismantling of colonial policies and practices It was believed that poverty and underdevelopment were consequences of the exploitative policies of the colonial masters who had no interest in improving living conditions for local communities Independence and freedom were anticipated to eradicate poverty ignorance and disease and the new leadership would accelerate economic development and prosperity However after more than 50 years of independence most African countries are still poor and underdeveloped and this poses a few questions Have African leaders abandoned their ambitions Are African challenges more complex than in other regions Has the political leadership failed to rise to the challenge In his relentless pursuit of African excellence and development Professor Lumkile Wiseman Nkuhlu offers profound insights and solutions to the challenges Africa has faced and continues to encounter He wrestles with the vexing question of how a continent with such a rich history and heritage as well as potential remains an underperforming region of the world and offers insights into potential pathways and strategies for breaking free from the vicious cycle of underdevelopment Africa can become the world s production powerhouse in the second half of this century provided that intentional and purposeful leadership emerges Purposeful Leadership for Africa in the 21st Century delves into the leadership strategies qualities and policies needed for an African renewal aiming to reposition the continent as a strategic and competitive global player      Nine Practices of 21st Century Leadership Gary DePaul,2022-07-22 Near the end of the 20th Century the leadership concept radically evolved away from the traditional concept of accomplishing work through others Unfortunately too many professionals unconsciously still have faulty

traditional assumptions that can get them their teams and their organizations in trouble The author has researched the evolution of leadership and summarizes seven contemporary principles twenty six underlying leadership beliefs and nine crucial practices of 21st Century Leadership While too many leadership books focus on qualities DePaul explains specific behaviors for practicing leadership The second edition includes new research about leadership and leadership development With the pandemic organizations have had to rely more on effective leadership to build high performing teams often at a distance Training departments have had to radically update how they develop employees at all levels and executive coaches have transitioned to virtual client support With all these environmental changes as well as new social pressures on organizations to embrace diversity equity and inclusion organizations need to change how they lead and avoid allowing their culture to develop by chance
