Verney,Inderjeet Parmar,2013-10-08 The 2008 presidential election was celebrated around the world as a seminal moment in U S political and racial history White liberals and other progressives framed the election through the prism of change while previously acknowledged demographic changes were hastily heralded as the dawn of a post racial America However by 2011 much of the post election idealism had dissipated in the wake of an on going economic and financial crisis escalating wars in Afghanistan and Libya and the rise of the right wing Tea Party movement By placing Obama in the historical context of U S race relations this volume interrogates the idealized and progressive view of American society advanced by much of the mainstream literature on Obama Barack Obama and the Myth of a Post Racial America takes a careful look at the historical

cultural and political dimensions of race in the United States using an interdisciplinary analysis that incorporates approaches from history political science and sociology Each chapter addresses controversial issues such as whether Obama can be considered an African American president whether his presidency actually delivered the kind of deep rooted changes that were initially prophesised and whether Obama has abandoned his core African American constituency in favour of projecting a race neutral approach designed to maintain centrist support Through cutting edge critically informed and cross disciplinary analyses this collection directly addresses the dimensions of race in American society through the lens of Obama s election and presidency

*Technologies of Speculation* Sun-ha Hong,2020-07-28 An inquiry into what we can know in an age of surveillance and algorithms Knitting together contemporary technologies of datafication to reveal a broader underlying shift in what counts as knowledge *Technologies of Speculation* reframes today s major moral and political controversies around algorithms and artificial intelligence How many times we toss and turn in our sleep our voluminous social media activity and location data our average resting heart rate and body temperature new technologies of state and self surveillance promise to re enlighten the black boxes of our bodies and minds But Sun ha Hong suggests that the burden to know and to digest this information at alarming rates is stripping away the liberal subject that knows for themselves and risks undermining the pursuit of a rational public What we choose to track and what kind of data is extracted from us shapes a society in which my own experience and sensation is increasingly overruled by data driven systems From the rapidly growing Quantified Self community to large scale dragnet data collection in the name of counter terrorism and drone warfare Hong argues that data s promise of objective truth results in new cultures of speculation In his analysis of the Snowden affair Hong demonstrates an entirely new way of thinking through what we could know and the political and philosophical stakes of the belief that data equates to knowledge When we simply cannot process all the data at our fingertips he argues we look past the inconvenient and the complicated to favor the comprehensible In the process racial stereotypes and other longstanding prejudices re enter our newest technologies by the back door Hong reveals the moral and philosophical equations embedded into the algorithmic eye that now follows us all

(In)Security: Identifying the Invisible Disruptors of Security Gitanjali Adlakha-Hutcheon,Candyce Kelshall,2024-10-12 What does it take to disrupt security How does one disrupt

the invisibility of insecurity How does one make the invisible factors that define and impact security visible For a start by giving voice to the unheard and the marginalized engaging non traditional understandings of security that might bring to light the cracks in our current security infrastructure and expose the insecurities that are hidden in plain sight These voices include generational geographic cultural ethnic and gender based perspectives of insecurity which are ignored or simply cannot be heard by traditional notions of security Presently there is a lack of understanding of the language of nuanced hate being whispered from the ground that inform civil discord These call for new intrastate actions that need to be taken to make communities safer and building layers of protective resilience into the continuing existence of the state Unresolved grievances lay the foundation for insecurity and instability for the future at a time when states need cohesiveness more than ever and there are significant invisible insecurities external to the state that need to be revealed The tapestry of interrelationships that enable security within a state requires equity access and agency among communities If we are to achieve this we must learn to see the invisible listen to the unheard and move beyond our static conceptions of security In so doing we build more resilient societies in the face of a dynamic threat environment and ensure the peaceful continued existence of states This book is a sounding board for positive disruption a source for alternative theories tools and models to aid mitigation of the whispered threats and the soft violence which accompanies chauvinism of any one way of being In this edited book the multiplicity of factors that impact security is explored through new lenses to glean insights such that we are better equipped to prevent harm and protect our security
