"This book is awesome!! I had spent thousands on other study material with no results. I was pleasantly surprised by how high quality the guide is despite it's incredibly affordable price tag. It provides an extensive overview of all the major clinical topics and the questions really boosted my confidence. I'm happy to say I passed my BCPS!"

-ASHLEY, PGY-1 COMMUNITY PHARMACY RESIDENT

"The BCPS certification is becoming more and more recognized. I'm a practicing clinical pharmacist in Singapore and this guide really attracted me since it was updated with the most recent guidelines without the crazy pricetag that ACCP and other associations were charging. It's exactly what I needed to pass the first time!"

Critical Care Study Guide Gerard J. Criner, Rodger E. Barnette, Gilbert E. D'Alonzo, 2010-06-27. Critical care medicine is a dynamic and exciting arena where complex pathophysiologic states require extensive knowledge and up-to-date clinical information. An extensive knowledge of basic pathophysiology as well as awareness of the appropriate diagnostic tests and treatments that are used to optimize care in the critically ill is essential. Since our first edition 7 years ago, new information crucial to the care and understanding of the critically ill patient has rapidly accumulated. Because this knowledge base crosses many different disciplines, a comprehensive multidisciplinary approach presenting the information is essential, similar to the multidisciplinary approach that is used to care for the critically ill patient. We have strived to provide this content in an easily digestible format that uses a variety of teaching tools to facilitate understanding of the presented concepts and to enhance information retention. To meet the demand to provide comprehensive and diverse education in order to understand the pathogenesis and optimum care of a variety of critical illnesses, we have substantially revised the prior topics in the first edition with updated information. We have also markedly expanded the number of topics covered to include acute lung injury and the acute respiratory distress syndrome, an expanded discussion of the physiology and operation of mechanical ventilation, obstetrical care in the ICU, neurosurgical emergencies, acute coronary syndromes, cardiac arrhythmias, role of whole body rehabilitation in the ICU, ethical conduct of human research in the ICU, and nursing care of the ICU patient.
