disciplines The text covers the widest range of materials from standard products to ecofriendly materials and components Up to date with respect to the latest Building Regulations and European British Standards Well illustrated with many colour images showing typical use of the materials in high quality construction **Making Better Buildings** Chris

Magwood,2014-03-01 Sustainable building from the ground up the pros and cons of the latest green and natural materials and technologies From foundation to finish a wealth of information is available on sustainable construction methods entire volumes have been published on individual green and natural building techniques But with so many different ideas to choose from there is no single resource that allows an owner or builder to quickly and objectively compare the merits of each system for their particular project Making Better Buildings cuts through the hype and provides the unvarnished facts about the upsides and downsides of the most widely discussed materials and technologies Drawing on the real world experiences of designer builders this comparative guide systematically and comprehensively examines each approach in terms of Cost sourcing labor intensity and ease of construction Energy efficiency embodied energy and environmental impacts Availability accessibility Viable applications and future potential Each chapter is rounded out by a chart which summarizes the material in a quick and accessible manner Whether you are an owner preparing to build a green or natural home or a conventional contractor determined to integrate sustainable alternatives into your existing construction practices this up to the minute resource will help you make the best decisions for your project while meeting your energy efficiency budgetary and site specific needs **Loft Conversions** John Coutts,2012-12-21

Pressure on space and changes in planning law mean that loft conversions are now at the forefront in the race to improve the performance of Britain s ageing housing stock Since 1990 roof space conversions have increased UK housing capacity by more than 200 million square feet a living area equivalent to a medium sized city without the loss of a single square foot of greenfield land Loft Conversions is the definitive technical guide to the conversion of roof spaces in single family dwellings It brings together a wealth of practical and regulatory guidance in a form that is easy to read and comprehensively illustrated This fully revised and updated second edition is intended primarily for architects builders surveyors and others professionally involved in the process of loft conversion The insights it provides are also invaluable to self builders and to householders wishing to achieve a deeper understanding of what a loft conversion involves Principles of Element Design Peter Rich,Yvonne Dean,2012-10-02

The construction of buildings is learnt through experience and the inheritance of a tradition in forming buildings over several thousand years Successful construction learns from this experience which becomes embodied in principles of application Though materials and techniques change various elements have to perform the same function Principles of Element Design identifies all the relevant elements and then breaks these elements down into all their basic constituents making it possible for students to fully understand the given theory and principles behind each part As all building projects are subject to guidance through the Building Regulations and British Standards this book gives an immediate reference back to relevant information to help

practitioners and contractors identify key documents needed Yvonne Dean B A Hons B A Open RIBA an architect energy consultant and materials technologist She also has 15 years experience as a lecturer travels widely and is a guest lecturer at many universities She pioneered an access course for Women into Architecture and Building which has been used as a template by others and has been instrumental in helping to change the teaching of technology for architects and designers Peter Rich AA Dipl Hons Architect started his career with 14 years experience as a qualified architectural technician He then joined the AA School of Architecture working with Bill Allen and John Bickerdike after his graduation later becoming a partner of Bickerdike Allen Rich and Partners He also taught building construction at the Bartlett School of Architecture University College London and architectural design at the Polytechnic of North London He now acts as a Consultant

Constructing Professional Discourse Concepción Orna-Montesinos, 2012-01-17 This book explores the fascinating role that language plays in the construction of non verbal objects by mapping out the ontological meaning of the specialised concepts and the domain specific knowledge embedded in them In doing so it provides a comprehensive linguistic insight into the discourse of professional domain specific communities and hence into the communication practices and procedures of those communities In this respect the book offers a response to the claims made by many of the most influential applied linguists today such as Vijay Bhatia 1993 2004 John Swales 1990 2004 or Ken Hyland 2002 among others who have consistently defended the need for applied linguistic research into the textual generic and social perspectives on the under researched interrelatedness of the discursive and professional practices of a discipline Specifically this book provides readers with an integrative multi perspective approach to the study of professional domain specific discourses While it mainly draws on the tenets of genre theory and discourse semantics it also nurtures from the theoretical and empirical foundations of applied linguistics cognitive linguistics corpus linguistics and ontological engineering The book starts from the analysis of domain specific texts as final written products with specific lexico grammatical semantic and rhetorical features to later enquire into the written products as textual artefacts closely linked to the social context of production and interpretation of the text This integrative approach provides fresh new insights into the way the processes of writing are affected by the community specific institutional and socio historical circumstances in which domain specific texts are produced **History,**

Performance and Conservation Barry Bridgwood, Lindsay Lennie, 2013-09-13 Ideal for students of architectural technology this volume of the Technologies of Architecture series covers the technologies available and the processes necessary for the conservation of existing buildings and environments This book provides in a single text the tools for students to be able to evaluate such buildings as well as an extensive understanding of the mechanisms which cause their deterioration and knowledge of the technologies available to correct their status The ever higher standards set for buildings especially in energy conservation contexts demand that practitioners appreciate how the performance of existing structures can be enhanced which is also covered Considering the work of conservation within a holistic perspective and historical context this

book is additionally invaluable for architecture and construction students *The Architects' Journal* ,2001-05 *Brickwork and Paving for House and Garden* Michael Hammett,2013-08-01 This is a comprehensive guide to clay bricks and mortars their physical and aesthetic properties and their use in a wide range of building projects **RIBA Journal** ,2006

Sustainability of Construction Materials Jamal Khatib,2016-08-12 Sustainability of Construction Materials Second Edition explores an increasingly important aspect of construction In recent years serious consideration has been given to environmental and societal issues in the manufacturing use disposal and recycling of construction materials This book provides comprehensive and detailed analysis of the sustainability issues associated with these materials mainly in relation to the constituent materials processing recycling and lifecycle environmental impacts The contents of each chapter reflect the individual aspects of the material that affect sustainability such as the preservation and repair of timber the use of cement replacements in concrete the prevention and control of metal corrosion and the crucial role of adhesives in wood products Provides helpful guidance on lifecycle assessment durability recycling and the engineering properties of construction materials Fully updated to take on new developments with an additional nineteen chapters added to include natural stone polymers and plastics and plaster products Provides essential reading for individuals at all levels who are involved in the construction and selection assessment and use and maintenance of materials Survey and Assessment of Traditionally Constructed Brickwork Moses Jenkins,2022-03-28 The principal aim of this book is to improve the practice of surveying traditionally constructed brickwork It aims to ensure that those who have a cause to survey buildings constructed of traditional pre 1919 brickwork have a well developed clear methodology for undertaking effective comprehensive surveys The book will help readers gain the proper level of knowledge expertise and skill to be able to survey these buildings correctly to recognise not just defects within the brickwork itself but also crucially the cause of these defects Experienced author Moses Jenkins presents a clear and concise methodology for the survey of brickwork in existing buildings with coverage including identifying repair needs understanding the cause of decay within brickwork ascertaining the age and significance of traditionally constructed brickwork and identifying significant technical and decorative features Despite the extensive use of traditionally constructed brick worldwide the knowledge and expertise to properly survey buildings of this type has not to date been laid out in a reliable and methodical way This book addresses this deficiency and provides an invaluable resource to all those who survey and assess buildings constructed of brickwork This includes building professionals such as architects surveyors engineers and those working in building conservation but also construction managers and students studying built environment disciplines *Ajfocus* ,1994 **Information Sources in Architecture and Construction** Valerie J. Nurcombe,1996 The new edition first 1983 comprises 24 chapters each written by an expert in the field who describes sources and in addition provides instructions in methodology and hints on keeping up with advances in information Coverage includes architectural history conservation contracts and liability *The British National*
