dignified and mellow What most of them have in common though is how much they enjoy spending time with the people in their lives They are also easy to integrate into a home with other dogs and even cats as long as the cat doesn't totally object to your new dog The biggest drawback to the breed is their numerous genetic health issues Part of the issues stem from the fact that the Boston Terrier has a short nose which increases the number of issues with their large eyes and hampers their ability to breathe as easily as dogs with longer snouts They are also prone to both allergies and stomach sensitivities so you will need to be careful about what you feed your dog and how much the environment affects your pup Most of the ailments are not life threatening they have a life expectancy between 13 and 15 years They are also incredibly easy to groom with their short haired coats
