**The British National Bibliography** Arthur James Wells, 2003 **Books in Print Supplement**, 2002 Subject Guide to Books in Print, 1997 *Books in Print*, 1994 **Resources in Education**, 1988 *Skies of Thunder* Caroline Alexander, 2025-02-13 Riveting The New York Times THE LITTLE KNOWN STORY OF THE ALLIES FIGHT IN WWII S CHAOTIC AND LETHAL CHINA BURMA INDIA THEATER In April 1942 the Imperial Japanese Army captured Burma closing the only ground route from India to China Supplies now had to be flown over the foothills of the treacherous Himalayas on the most dangerous air route in the world Delving into memoirs diaries and official records Caroline Alexander tells the story of the airmen who braved this perilous journey flying unreliable aircraft through monsoons and enemy fire with primitive navigation tools The result is a litany of both deadly crashes and astonishing feats of survival Highlighting the efforts of units like the Chindits and Merrill s Marauders and examining the political tensions between Roosevelt Churchill and Chiang Kai shek this book also exposes the fractures between the Allies and the impact of their decisions on post war relations Tiger Check Steven A. Fino, 2017-11-01 How did American fighter pilots respond to the challenges posed by increasing automation Spurred by their commanders during the Korean War to be tigers aggressive and tenacious American fighter pilots charged headlong into packs of fireball spewing enemy MiGs relying on their keen eyesight piloting finesse and steady trigger fingers to achieve victory But by the 1980s American fighter pilots vanquished their foes by focusing on a four inch square cockpit display manipulating electromagnetic waves and launching rocket propelled guided missiles from miles away In this new era

of automated long range air combat can fighter pilots still be considered tigers Aimed at scholars of technology and airpower aficionados alike Steven A Fino's Tiger Check offers a detailed study of air to air combat focusing on three of the US Air Force's most famed aircraft the F 86E Sabre the F 4C Phantom II and the F 15A Eagle Fino argues that increasing fire control automation altered what fighter pilots actually did during air to air combat Drawing on an array of sources as well as his own decade of experience as an F 15C fighter pilot Fino unpacks not just the technological black box of fighter fire control equipment but also fighter pilots attitudes toward their profession and their evolving aircraft He describes how pilots grappled with the new technologies acutely aware that the very systems that promised to simplify their jobs while increasing their lethality in the air also threatened to rob them of the quintessential albeit mythic fighter pilot experience Finally Fino explains that these new systems often required new unique skills that took time for the pilots to identify and then develop Eschewing the typical great machine or great pilot perspectives that dominate aviation historiography Tiger Check provides a richer perspective on humans and machines working and evolving together in the air The book illuminates the complex interactions between human and machine that accompany advancing automation in the workplace Computer Paul Atkinson,2010-08-15 The pixelated rectangle we spend most of our day staring at in silence is not the television as many long feared but the computer the ubiquitous portal of work and personal lives At this point the computer is almost so common we don't notice it in our view It's difficult to envision that not that long ago it was a gigantic room sized structure only to be accessed by a few inspiring as much awe and respect as fear and mystery Now that the machine has decreased in size and increased in popular use the computer has become a prosaic appliance little more noted than a toaster These dramatic changes from the daunting to the ordinary are captured in Computer by design historian Paul Atkinson Here Atkinson chronicles the changes in physical design of the computer and shows how these changes in design are related to changes in popular attitude Atkinson is fascinated by how the computer has been represented and promoted in advertising For example in contrast to ads from the 1970s and 80s today's PC is very PC genderless and largely status free Computer also considers the role of the computer as a cultural touchstone as evidenced by its regular appearance in popular culture including the iconography of the space age HAL from 2001 A Space Odyssey James Bond's gadgetry and Stars War and Star Trek Computer covers many issues ignored by other histories of computing which have focused on technology and the economics involved in their production but rarely on the role of fashion in the physical design and promotion of computers and their general reception The book will appeal to professionals and students of design and technology as well as those interested in the history of computers and how they have shaped and been shaped by our lives Great Warrior Leaders/thinkers ,1989
