At the Deathbed of Darwinism Dennert Eberhard, 2016-06-23 Unlike some other reproductions of classic texts 1 We have not used OCR Optical Character Recognition as this leads to bad quality books with introduced typos 2 In books where there are images such as portraits maps sketches etc We have endeavoured to keep the quality of these images so they represent accurately the original artefact Although occasionally there may be certain imperfections with these old texts we feel they deserve to be made available for future generations to enjoy

At the Deathbed of Darwinism Eberhard Dennert, Edwin V. O'Harra, John H. Peschges, 1904 **The Evolutions of Modernist Epic** Václav Paris, 2021 Explores how modernist national narrative successively reimagined the evolutionary epic from the 1910s to the 1930s **The Arrival of the Fittest** Jim Endersby, 2025-01-06 In the early twentieth century varied audiences took biology out of the hands of specialists and transformed it into mass culture transforming our understanding of heredity in the process In the early twentieth century communities made creative use of the new theories of heredity in circulation at the time including the now largely forgotten mutation theory of Hugo de Vries Science fiction writers socialists feminists and utopians are among those who seized on the amazing possibilities of rapid and potentially controllable evolution De Vries's highly respected scientific theory only briefly captured the attention of the scientific community but its many fans appropriated it for their own wildly imaginative ends Writers from H G Wells and Edith Wharton to Charlotte Perkins Gilman J B S Haldane and Aldous Huxley created a new kind of imaginary future which Jim Endersby calls the biotopia It took the ambiguous possibilities of biology utopian and dystopian and reimagined them in ways that still influence the public's understanding of the life sciences The Arrival of the Fittest recovers the fascinating long forgotten origins of ideas that have informed works of fiction from Brave New World to the X Men movies all while reflecting on the lessons positive and negative that this period might offer us

The Origins of Catholic Evolutionism, 1831-1950 Kenneth W. Kemp, 2025 The history of the Catholic Church's response to evolutionary biology has often been badly misrepresented as antagonistic In fact its response is better characterized as a long process of accommodation This work is a comprehensive introduction to the work of the Catholic scientists and theologians who worked out the details of that accommodation Few Catholics found the evolutionary origin of plant and animal species theologically objectionable None thought that evolutionary processes provided a sufficient account of the origin of the first human beings Catholics differed over whether those processes played a role in the origin of the first human body Catholic evolutionism began with the work of four nineteenth century scientists who might be called the pioneers of Catholic evolutionism Belgian geologist Jean Baptiste d Omalius d Halloy English anatomist George Mivart Italian anatomist Filippo De Filippi and French paleontologist Albert Gaudry The next generations of Catholic evolutionists writing in the period from about 1890 1940 included scientists Jesuit entomologists Erich Wasmann and Felix R schkamp as well as priests who focused more exclusively on the question of compatibility Dalmace Leroy John Zahm Henry de Dorlodot and Ernest

Messenger Among the scientists might also be included French paleontologist Pierre Teilhard de Chardin who made some contributions to the general idea of the compatibility of evolutionary biology and Catholic theology but who eventually veered off in the direction of a comprehensive evolutionary theology of nature the details of which are beyond the scope of this book Catholic anti evolutionists made efforts to have the Church prohibit works of Catholic evolutionism that in their judgment gave evolutionary processes too great a role in the formation of the human body or that relied on problematic principles of hermeneutics Efforts on the former front were eventually blocked by Pope Pius XI The first magisterial statement on the question came however only in 1950 with Pope Pius XII's encyclical *Humani generis* which provisionally declared the orthodoxy of evolutionary accounts of the origin of the human body In addition to providing details about Catholic evolutionists and the magisterium the book also reviews the treatment of the new ideas in Catholic encyclopedias periodicals and textbooks Although written in the first instance as a work of scholarship the book was also written with attention to the needs of scientists priests and members of the general public who are interested in the question

At the Deathbed of Darwinism: A Series of Papers Eberhard Dennert, 2019-12-09 In *At the Deathbed of Darwinism A Series of Papers* Eberhard Dennert presents a compelling critique of Darwinian evolution challenging its foundational principles and offering an alternative perspective rooted in design and purpose Employing a scholarly tone Dennert engages with scientific literature and philosophical arguments weaving a narrative that reflects the intellectual debates of the early 20th century This collection of essays employs a meticulous examination of both biological evidence and theological implications positioning itself within the broader context of the science religion discourse as he seeks to dismantle the prevailing evolutionary paradigm Eberhard Dennert a passionate advocate for creationism was influenced by the theological upheavals and scientific advancements of his time His background in natural sciences intertwines with a deep seated commitment to exploring the intersection between faith and science Dennert's scholarly pursuits including his involvement in various debates on evolution culminate in a work that is both a testament to his convictions and a reflection of the contentious atmosphere surrounding the Darwinian theory at the time For readers interested in the debates surrounding evolution and creationism Dennert's *At the Deathbed of Darwinism* offers an insightful and critical resource It invites thoughtful consideration of the tensions between faith and science making it a valuable addition for scholars students and anyone intrigued by the ongoing discourse of human origins

Antievolutionism Before World War I Ronald L. Numbers, 2021-10-17 Originally published in 1995 *Antievolutionism Before World War I* is the first volume in the series *Creationism in Twentieth Century America* reissued in 2021 The volume brings together original sources from the beginning of the twentieth century critiquing Darwinism and the theory of natural selection The sources included in this collection debate the role of natural selection in evolution as well wider aspects of Darwinian theory from a creationist stance The essays feature prominent figures from the period in the fields of naturalism philosophy and theology and includes contributions from Alexander Patterson Eberhard Dennert Luther

Tracy Townsend and George Frederick Wright The collection will be of especial interest to natural historians and theologians as well as academics of philosophy geology and history At the Deathbed of Darwinism Eberhard Dennert,2000
