Global Burning Eve Darian-Smith, 2022-04-19 How extreme right antidemocratic governments around the world are prioritizing profits over citizens stoking catastrophic wildfires and accelerating global climate change Recent years have seen out of control wildfires rage across remote Brazilian rainforests densely populated California coastlines and major cities in Australia What connects these separate events is more than immediate devastation and human loss of life In Global Burning Eve Darian Smith contends that using fire as a symbolic and literal thread connecting different places around the world allows us to better understand the parallel and related trends of the growth of authoritarian politics and climate crises and their interconnected global consequences Darian Smith looks deeply into each of these three cases of catastrophic wildfires and finds key similarities in all of them As political leaders and big business work together in the pursuit of profits and power anti environmentalism has become an essential political tool enabling the rise of extreme right governments and energizing their populist supporters These are the governments that deny climate science reject environmental protection laws and foster exclusionary worldviews that exacerbate climate injustice The fires in Australia Brazil and the United States demand acknowledgment of the global systems of inequality that undergird them connecting the political erosion of liberal democracy with the corrosion of the environment Darian Smith argues that these wildfires are closely linked through capitalism colonialism industrialization and resource extraction In thinking through wildfires as environmental and political phenomenon Global Burning challenges readers to confront the interlocking powers that are ensuring our future ecological collapse

Mediated Climate Adrienne Russell, 2023-08-08 To what extent does journalism deserve blame for the failure to address climate change over the last thirty years Critics point out that climate coverage has often lacked necessary urgency and hewed to traditional notions of objectivity and balance that allowed powerful interests mainly fossil fuel companies to manufacture doubt Climate journalism however developed alongside the digital media landscape which is characterized by rampant misinformation political polarization unaccountable tech companies unchecked corporate power and vast inequalities Under these circumstances journalism struggled and bad actors flourished muddling messages while emissions mounted and societies struggled to avert catastrophe The *Mediated Climate* explores the places where the climate and information crises meet examining how journalism activism corporations and Big Tech compete to influence the public Adrienne Russell argues that the inadequate response to climate change is intertwined with the profound challenges facing the communications environment She demonstrates that the information crisis is driven not only by technological changes but also by concentrated power that predates the rise of digital media companies Efforts to improve climate coverage must take into account the larger social and material contexts in which journalism operates and the broader power dynamics that shape public discourse Drawing on interviews with journalists and activists Russell considers the ways recent movements are battling misinformation She offers timely recommendations to foster engagement with climate issues and calls on readers to join in efforts to reshape the media landscape to better serve the public interest **BBC Worldwide**, 1996 [Not Zero](#)

Ross Clark, 2023-02-02 Bravely challenging the Establishment consensus forensically argued Mail on Sunday The British government has embarked on an ambitious and legally binding climate change target reduce the country's greenhouse gas emissions to Net Zero by 2050 The Net Zero policy was subject to almost no parliamentary or public scrutiny and is universally approved by our political class But what will its consequences be Ross Clark argues that it is a terrible mistake an impractical hostage to fortune which will have massive downsides Achieving the target is predicated on the rapid development of technologies that are either non-existent highly speculative or untested Clark shows that efforts to achieve the target will inevitably result in a huge hit to living standards which will clobber the poorest hardest and gift a massive geopolitical advantage to hostile superpowers such as China and Russia The unrealistic and rigid timetable it imposes could also result in our committing to technologies which turn out to be ineffective all while distracting ourselves from the far more important objective of adaptation This hard hitting polemic provides a timely critique of a potentially devastating political consensus which could hobble Britain's economy cost billions and not even be effective **2006 Atlantic Hurricane Season**, [The Octopus in the Parking Garage](#)

Rob Verchick, 2023-04-11 Winner 2023 Choice Outstanding Academic Title One morning in Miami Beach an unexpected guest showed up in a luxury condominium complex's parking garage an octopus The image quickly went viral But the octopus and the combination of infrastructure quirks and climate impacts that left it stranded is more than a funny meme It's a potent symbol of the disruptions that a changing climate has already brought to

our doorsteps and the ways we will have to adjust Rob Verchick examines how we can manage the risks that we can no longer avoid laying out our options as we face climate breakdown Although reducing carbon dioxide emissions is essential we need to adapt to address the damage we have already caused Verchick explores what resilience looks like on the ground from early humans on the savannas to today's shop owners and city planners He takes the reader on a journey into the field paddling through Louisiana's bayous hiking in one of the last refuges of Joshua trees in the Mojave Desert and diving off Key Largo with citizen scientists working to restore coral reefs The book emphasizes disadvantaged communities which bear the brunt of environmental risk arguing that building climate resilience is a necessary step toward justice Engaging and accessible for nonexpert concerned citizens The Octopus in the Parking Garage empowers readers to face the climate crisis and shows what we can do to adapt and thrive Climate Change and Global Health Colin D. Butler, Kerry

This book delves into the corporate takeover of public morality or woke capitalism Discussing the political causes that it has adopted and the social causes that it has not it argues that this extension of capitalism has negative implications for democracy's future **Fifth Generation Warfare** Armin Krishnan, 2024-03-11 This book outlines the concept of Fifth Generation Warfare 5GW and demonstrates its relevance for understanding contemporary conflicts Non kinetic modes of attack and war waged by groups or non state actors at the societal level has been termed 5GW This book discusses the theory of generational warfare and explores the key ideas of 5GW such as secrecy the manipulation of proxies the manipulation of identity and culture including disinformation and big data and the use of psychological warfare These techniques are used to achieve strategic objectives such as inducing desired behaviour and controlling human terrain without resorting to overt war or overt violence The text expands the debate on 5GW by exploring emerging technologies and how they could be used for maliciously shaping human society and even for maliciously changing the genetic makeup of a population for the purpose of unprecedented social control The work closes with comments on the possibility of a Sixth Generation of Warfare which targets technical systems to possibly collapse a society through strategic sabotage Overall the
