*Natures in Translation* Alan Bewell, 2017-01-02 Understanding the dynamics of British colonialism and the enormous ecological transformations that took place through the mobilization and globalized management of natures For many critics Romanticism is synonymous with nature writing for representations of the natural world appear during this period with a freshness concreteness depth and intensity that have rarely been equaled Why did nature matter so much to writers of the late eighteenth and early nineteenth centuries And how did it play such an important role in their understanding of themselves and the world In *Natures in Translation* Alan Bewell argues that there is no Nature in the singular only natures that have undergone transformation through time and across space He examines how writers as disparate as Erasmus and Charles Darwin Joseph Banks Gilbert White William Bartram William Wordsworth John Clare and Mary Shelley understood a world in which natures were traveling and resettling the globe like never before Bewell presents British natural history as a translational activity aimed at globalizing local natures by making them mobile exchangeable comparable and representable Bewell explores how colonial writers in the period leading up to the formulation of evolutionary theory responded to a world in which new natures were coming into being while others disappeared For some of these writers colonial natural history held the promise of ushering in a cosmopolitan nature in which every species through trade and exchange might become a true citizen of the world Others struggled with the question of how to live after the natures they depended upon were gone Ultimately *Natures in Translation* demonstrates that far from being separate from the dominant concerns of British imperial culture nature was integrally bound up with the business of empire

*English Translations* Alexander Chalmers, 1810 *A Translation of the S  ir Mutaqherin* Ghul  m H  sayn Kh  n   b    b   , Tab  tab    Ghol  m-Hoseyn Kh  n, 1789 *Translation and Modernism* Emily O. Wittman, 2023-12-08 This innovative volume extends existing conversations on translation and modernism with an eye toward bringing renewed attention to its ethically complex appropriative nature and the subsequent ways in which modernist translators become co creators of the materials they translate Wittman builds on existing work at the intersection of the two fields to offer a more dynamic nuanced and wider lens on translation and modernism The book

draws on scholarship from descriptive translation studies polysystems theory and literary translation to explore modernist translators appropriation of source texts and their continuous recalibrations of equivalence between source text and translation Chapters focus on translation projects from a range of writers including Beckett Garnett Lawrence Mansfield and Rhys with a particular spotlight on how women s translations and women translators innovations were judged more critically than those of their male counterparts Taken together the volume puts forth a fresh perspective on translation and modernism and of the role of the modernist translator as co creator in the translation process This book will be of particular interest to scholars in translation studies modernism reception theory and gender studies

Joint Publications Research Service, 1978 Translating the World Birgit Tautz, 2017-12-07 In *Translating the World* Birgit Tautz provides a new narrative of German literary history in the late eighteenth and early nineteenth centuries Departing from dominant modes of thought regarding the nexus of literary and national imagination she examines this intersection through the lens of Germany s emerging global networks and how they were rendered in two very different German cities Hamburg and Weimar German literary history has tended to employ a conceptual framework that emphasizes the nation or idealized citizenry yet the experiences of readers in eighteenth century German cities existed within the context of their local environments in which daily life occurred and writers such as Lessing Schiller and Goethe worked Hamburg a flourishing literary city in the late eighteenth century was eventually relegated to the margins of German historiography while Weimar then a small town with an insular worldview would become mythologized for not only its literary history but its centrality in national German culture By interrogating the histories of and texts associated with these cities Tautz shows how literary styles and genres are born of local rather than national interaction with the world Her examination of how texts intersect and interact reveals how they shape and transform the urban cultural landscape as they are translated and move
