Steer, 2000 **BDI-II, Beck Depression Inventory** Aaron T. Beck, Robert A. Steer, Gregory K. Brown, 1996 **BDI-II** Aaron Temkin Beck, 1996 **The Concise Corsini Encyclopedia of Psychology and Behavioral Science** W. Edward Craighead, Charles B. Nemeroff, 2004-04-19 Edited by high caliber experts and contributed to by quality researchers and practitioners in psychology and related fields Includes over 500 topical entries Each entry features suggested readings and extensive cross referencing Accessible to students and general readers Edited by two outstanding scholars and clinicians **Guidelines for the Systematic Treatment of the Depressed Patient** Larry E. Beutler, John Clarkin, Bruce Bongar, 2000-02-03 From initial consultation to termination of treatment psychologists and other mental health practitioners make a series of crucial decisions to determine the progress and therapy of the patient These decisions have varied implications such as the clinical course of the patient the efficacy and efficiency of the treatment and the cost of the sessions Thus the decisions made by mental health professionals need to be accurate and consistent respecting a series of guidelines that will ultimately benefit the patient This is the first in a series of guidebooks that is designed to do just that by providing practitioners with some structure in the development of treatment programs Previous guidelines have been based on consensus panels of experts or on the opinions of membership groups causing guidelines to be very far off from the findings of empirical research Here guidelines are presented in terms of treatment principles rather than in terms of specific treatment models or theories and they do not favor one theory of psychotherapy over another Instead they define strategies and considerations that can be woven into comprehensive treatment programs The entire series of guidebooks will cover numerous topics including anxiety disorders drug abuse alcohol abuse and treatment of serious mental disorders This volume will cover in detail the nature of depression issues in treatment research contemporary treatments and implications for education and training It is ideal for postgraduates and professionals in the mental health field and is intended to provide important background on treatment of non bipolar depressive disorders **A Compendium of Neuropsychological Tests** Esther Strauss, Elisabeth M.
