Bbc News South America:

BBC World Service Gordon Johnston, Emma Robertson, 2019-11-14 This book is the first full length history of the BBC World Service from its interwar launch as short wave radio broadcasts for the British Empire to its twenty first century incarnation as the multi media global platform of the British Broadcasting Corporation The book provides insights into the BBC s working relationship with the Foreign Office the early years of the Empire Service and the role of the BBC during the Second World War In following the voice of the BBC through the Cold War and the contraction of the British empire the book argues that debates about the work and purposes of the World Service have always involved deliberations about the future of the UK and its place in the world In current times these debates have been shaped by the British government s commitment to leave the European Union and the centrifugal currents in British politics which in the longer term threaten the integrity of the United Kingdom Through a detailed exploration of its past the book poses questions about the World Service s possible future and argues that for the BBC the question is not only what it means to be a global broadcaster as we enter the third decade of the twenty first century but what it means to be a national broadcaster in a divided kingdom South America and Peace Operations Kai Michael Kenkel, 2013-07-18 This volume is the first English language work to focus specifically on South America in the context of peace operations The region of South America has been undergoing significant changes recently with regard to its attitudes towards participation in peace operations Leaving behind a strong reluctance with regard to intervention the states have recently taken on a much stronger presence among UN peacekeepers The foremost showcase of this more robust and responsible stance has been MINUSTAH the current UN mission in Haiti South American contributors provide over half the operation s troops and the Force Commander is provided by Brazil This book is intended as an introduction for researchers to the nexus of issues surrounding South America s increasing influence as a contributor to peace operations The authors provide the reader with a historically and theoretically grounded understanding of what motivates defence policy and decisions on intervention in the region Featuring contributions from prominent thinkers in the field and a broad range of case studies this volume successfully combines practical applicability with diversity of analysis This book will be of much interest to students of peacekeeping South American politics peace and conflict studies security studies and International Relations in general *Russia and Latin America* M. Astrada, 2013-04-26 Today extensive interconnected global processes provide non state actors with a degree of agency that a System of States paradigm cannot account for alone Using Russia Latin America relations as a case study and applying a Complex Adaptive Systems perspective this work explores alternative international mechanisms of order and organization The Known World of Broadcast News Stanley Baran, 2003-09-02 Radio and television news are expanding everywhere often at the expense of print media Developments in global communications in theory at least have made the world smaller An event anywhere can theoretically be reported anywhere else on radio within minutes on television within hours But theory and practice are often far apart

Broadcast News has become a global business almost like the music industry with its own Top 10 and an inevitable streamlining of taste A few major organisations control the newsflow Syndicators guarantee that more and more of us get to see or hear the same stories This is typified by the growth of independent or local news stations and cable suppliers competing mercilessly with the traditional giants of the news airwaves the US Networks the BBC and other Public Service Broadcasters etc But does this development satisfy the democratic demands of enlightened society and of informed citizens This book presents a catalogue of worries but also some rays of hope It looks in detail at news broadcasters on both sides of the Atlantic It also covers the international broadcasting scene as well as third world countries and recent developments in Glasnost s USSR A major empirical study of what we get from broadcast news taking the case of the USA Britain and Sweden is also presented Models useful for understanding both the present and the future are suggested
