Lenze,Jr.,2016-09-30

Since the Arab Spring militaries have received renewed attention regarding their intervention into politics of Middle Eastern and South Asian states This book examines the factors which influence military intervention and withdrawal from politics namely United States and Soviet Russian economic and military aid and how this affects democratic transitions and consolidation The militaries of Algeria Egypt Pakistan and Turkey have used nationalism to justify their interventions into politics while ensuring that withdrawal would only occur if national identity were protected This book examines important states in the Islamic World which have experienced similar historical trajectories briefly experimented with democracy and had the military become a dominant institution in the state All four countries differ in their levels of ethnic conflict importance placed on the country by the international community and internal security concerns The common result of international influence on political development however is that the military will take a keener interest in politics and be more reluctant to disengage

**The One Belt One Road (OBOR) Initiative and the Port of Piraeus** Tatiana Gontika, 2021-08-05 This book provides the reader with a better understanding of the One Belt One Road OBOR initiative its various projects around the world and its consequences at a local as well as an international level Background information on both Chinese and Greek sociopolitical history and their maritime industry is provided The book also provides readers with the opinions of people directly involved with the Piraeus Port China Ocean Shipping Group Company COSCO deal through interviews conducted and included in the book OBOR a signature initiative of Chinese President Xi Jinping is currently one of the most frequently discussed enterprises worldwide This controversial mix of worldwide projects has put both China and Xi at the center of attention and not in a positive way Of course not all projects included in the initiative have been or are likely to be successful but the initiative has far ranging economic cultural and political potential OBOR in its essence is an attempt by the Chinese government to secure a paramount position in global finance for the country and ensure that primacy extends far into the future In particular it is an attempt to ensure that there are enough natural resources for China to support itself in the long term Therefore the areas selected for the implementation

and development of OBOR are deliberately strategic One of the countries that China has chosen to invest in is Greece specifically the Port of Piraeus The OBOR initiative has many similarities with the ancient Silk Road Although the ancient route and modern concept are in no way identical many similarities become evident when the two are compared To understand China's motivation to build such a network looking back at history is required This project was long in the making Various discussions took place both on an international and a domestic level until all parties came to an agreement The deal at Piraeus between Greece and China affected more people than the politicians and the shipowners it affected everyone involved in the operations of the port as well as the residents of the area To further comprehend the impact on their lives one must see things through their eyes and there is no better way than contacting individuals and conversing with them In conclusion the specific deal at Piraeus and the OBOR initiative as a whole have the potential of benefiting the international and local communities However specific measures must be taken and governments must collaborate in order for the deal in Piraeus and the OBOR initiative to have the most beneficial and the least negative impact
