Rethinking Social Studies E. Wayne Ross, 2017-03-01 Like the schools in which it is taught social studies is full of alluring contradictions It harbors possibilities for inquiry and social criticism liberation and emancipation Social studies could be a site that enables young people to analyze and understand social issues in a holistic way finding and tracing relations and interconnections both present and past in an effort to build meaningful understandings of a problem its context and history to envision a future where specific social problems are resolved and take action to bring that vision in to existence Social studies could be a place where students learn to speak for themselves in order to achieve or at least strive toward an equal degree of participation and better future Social studies could be like this but it is not Rethinking Social Studies examines why social studies has been and continues to be profoundly conversing in nature the engine room of illusion factories whose primary aim is reproduction of the existing social order where the ruling ideas exist to be memorized regurgitated internalized and lived by Rethinking social studies as a site where students can develop personally meaningful understandings of the world and recognize they have agency to act on the world and make change rests on the premises that social studies should not show life to students but bringing them to life and that the aim of social studies is getting students to speak for themselves to understand people make their own history even if they make it in already existing circumstances These principles are the foundation for a new social studies one that is not driven by standardized curriculum or examinations but by the perceived needs interests desires of students communities of shared interest and ourselves as educators Rethinking Social Studies challenges readers to reconsider conventional thought and practices that sustain the status quo in classrooms schools and society by critically engaging with questions and issues such as neutrality in the classroom how movement conservatism shapes the social studies curriculum how corporate driven education affects schools teachers and curriculum ways in which teachers can creatively disrupt everyday life in the social studies classroom going beyond language and inclusive content in social justice oriented teaching making critical pedagogy relevant to everyday life and classroom practice the invisibility of

class in the social studies curriculum and how to make it a central organizing concept class war class consciousness and social studies in the age of empire what are your ideals as a social studies education and how do you keep them and still teach and what it means to be a critical social studies educator beyond the classroom Tactical Performance Larry Bogad,2016-02-26 Tactical Performance tells fun mischievous stories of underdogs speaking mirth to power through creative targeted activist performance in the streets of cities around the world This compelling inspiring book also provides the first ever full length practical and theoretical guide to this work L M Bogad one of the most prolific practitioners and scholars of this genre shares the most effective non violent tactics and theatrics employed by groups which have captured the public imagination in recent years Tactical Performance explores carnivalesque protest in unique depth looking at the possibilities for direct action and sometimes shocking confrontation with some of the most powerful institutions in the world It is essential reading for anyone interested in creative pranksterism and the global justice movement **Resistance** Laura K. Naegler,2025-09-26 This book provides a broad and detailed theoretical exploration of resistance and the complexities of power and social change Engaging with past and contemporary theoretical debates and drawing from the author s empirical research in Europe the USA and South East Asia the book both challenges the limits of existing conceptual paradigms and advances theoretical knowledge about resistance The chapters illuminate subjects such as reactive modes of opposition and against ness creative and future oriented modes of resistance cultural and digital resistance the role of emotions in resisting resistant epistemologies and radical imaginations the commodification of rebelliousness State and public responses to resistance and the significance of moments of confrontation between power and its opposition By doing so the work elucidates not only how and why people resist or why they don t but also how conceptualising resistance enables us to understand contemporary social cultural and political conflicts and cleavages **Play like a Feminist.** Shira Chess,2020-08-18 An important new voice provides an empowering look at why video games need feminism and why all of us should make space for more play in our lives You play like a girl It s meant to be an insult accusing a player of subpar un fun playing If you re a girl and you grow up do you play like a woman whatever that means In this provocative and enlightening book Shira Chess urges us to play like feminists Playing like a feminist is empowering and disruptive it exceeds the boundaries of gender yet still advocates for gender equality Roughly half of all players identify as female and Gamergate galvanized many of gaming s disenfranchised voices Chess argues games are in need of a creative platform expanding metaphysical explosion and feminism can take us there She reflects on the importance of play playful protest and how feminist video games can help us rethink the ways that we tell stories Feminism needs video games as much as video games need feminism Play and games can be powerful Chess s goal is for all of us regardless of gender orientation ethnicity ability social class or stance toward feminism to spend more time playing as a tool of radical disruption Education Gender and Climate for Youth Tudás Alapítvány,2023-11-17 The Earth s climate is heavily changing and failure to limit warming to below

2 C could make further impact in the climate system irreversible and characterised by cataclysmic consequences The adverse impacts of climate emergency continue to be too much of a burden for the poorest and most vulnerable especially girls and women with fewer opportunities Despite growing recognition of these differential vulnerabilities as well as the unique experiences and skills that women and men bring to environmental sustainability efforts the former still have less economic political and legal influence and are therefore less able to cope than those who are most exposed to the adverse effects of climate emergency On the other hand girls and women are powerful agents of change and continue to make increasingly significant contributions to sustainability despite existing structural changes and socio cultural barriers This guide will serve as an approximation towards the above mentioned issues and is destined for Gender and social inclusion specialists seeking a broader range of tips tactics tools and exercises with which to increase the awareness understanding and capacity of other colleagues to integrate gender and social inclusion into climate action Climate degrowth and sustainability practitioners with some knowledge of and openness to gender and social inclusion issues who can use the modules and the references contained within them to deepen their own knowledge and thus gain confidence to use the materials to train others Youth workers and young leaders who are responsible for designing and teaching climate change resilience adaptation and mitigation interventions The materials in this Guide have very broad applicability in these domains Given the evidence we present on the importance of gender sensitivity and social inclusion in the implementation of effective climate projects and programmes we assert that the approaches suggested are not just for people with a formal mandate on these issues the approaches are for everyone working on climate and social justice

Asia and Latin America to provide an account of how a radical geographical imagination can inform our understanding and the prosecution of protest
