A Window On Eternity A Biologists Walk Through Gorongosa National Park:

A Window on Eternity Edward O., Wilson, 2014-04-22 The remarkable story of how one of the most biologically diverse habitats in the world was destroyed restored and continues to evolve with stunning full color photographs by two of the world's best wildlife photographers A Window on Eternity is a stunning book of splendid prose and gorgeous photography about one of the biologically richest places in Africa and perhaps in the world Gorongosa National Park in Mozambique was nearly destroyed in a brutal civil war then was reborn and is now evolving back to its original state Edward O Wilson's personal luminous description of the wonders of Gorongosa is beautifully complemented by Piotr Naskrecki's extraordinary photographs of the park's exquisite natural beauty A bonus DVD of Academy Award winning director Jessica Yu's documentary The Guide is also included with the book Wilson takes readers to the summit of Mount Gorongosa sacred to the local people and the park's vital watershed From the forests of the mountain he brings us to the deep gorges on the edge of the Rift Valley previously unexplored by biologists to search for new species and assess their ancient origins He describes amazing animal encounters from huge colonies of agricultural termites to specialized raider ants that feed on them to giant spiders a battle between an eagle and a black mamba conversations with traumatized elephants that survived the slaughter of the park's large animals and more He pleads for Gorongosa and other wild places to be allowed to exist and evolve in its timeless way uninterrupted into the future As he examines the near destruction and rebirth of Gorongosa Wilson analyzes the balance of nature which he observes teeters on a razor's edge Loss of even a single species can have serious ramifications throughout an ecosystem and yet we are carelessly destroying complex biodiverse ecosystems with unknown consequences The wildlands in which these ecosystems flourish gave birth to humanity and it is this natural world still evolving that may outlast us and become our legacy our window on eternity *On the Nature of Ecological Paradox*

Michael Charles Tobias, Jane Gray Morrison, 2021-05-18 This work is a large powerfully illustrated interdisciplinary natural sciences volume the first of its kind to examine the critically important nature of ecological paradox through an abundance of lenses the biological sciences taxonomy archaeology geopolitical history comparative ethics literature philosophy the history of science human geography population ecology epistemology anthropology demographics and futurism The ecological paradox suggests that the human biological and from an insular perspective successful struggle to exist has come at the price of isolating *H sapiens* from life sustaining ecosystem services and far too much of the biodiversity with which we find ourselves at crisis level odds It is a paradox dating back thousands of years implicating millennia of human machinations that have been utterly ruinous to biological baselines Those metrics are examined from numerous multidisciplinary approaches in this thoroughly original work which aids readers particularly natural history students who aspire to grasp the far reaching dimensions of the Anthropocene as it affects every facet of human experience past present and future and the rest of planetary sentience With a Preface by Dr Gerald Wayne Clough former Secretary of the Smithsonian Institution and

President Emeritus of the Georgia Institute of Technology Foreword by Robert Gillespie President of the non profit Population Communication **Science, Conservation, and National Parks** Steven R. Beissinger, David D. Ackerly, Holly Doremus, Gary E. Machlis, 2017-01-13 An eclectic enjoyable mix of literature reviews personal experience and case studies and practical advice from leaders in their subdisciplines Eleanor J Sterling Chief Conservation Scientist Center for Biodiversity Conservation American Museum of Natural History With the US National Park Service over one hundred years old parks and protected areas worldwide are under increasing threat from storms and fires of greater severity plant and animal extinctions the changing attitudes of a public that has become more urbanized and the political pressures of narrow special interest groups In the face of such rapid environmental and cultural changes Science Conservation and National Parks gathers a group of renowned scholars including Edward O Wilson Jane Lubchenco Thomas Dietz and Monica Turner who address these problems and in the hope of securing a future for protected areas that will push forward the frontiers of biological physical and social science in and for parks Contributors provide answers to a number of key conservation questions such as How should stewardship address climate change urban encroachment and pollution and invasive species How can society especially youth become more engaged with nature and parks What are appropriate conservation objectives for parks in the Anthropocene Charting a course for the parks of the next century Science Conservation and National Parks catalyzes the continued evolution of US park conservation policy and serves as an inspiration for parks conservation and management worldwide Offers a refreshing holistic treatment of the linkages and mutual dependencies between parks and science Compelling William B Monahan USDA Forest Service and formerly of the US National Park Service This is a testament to what can be achieved by determined conservationists Biodiversity and Conservation journal *Protecting the Wild* George Wuerthner, Eileen Crist, Tom Butler, 2015-02-19 Protected natural areas have historically been the primary tool of conservationists to conserve land and wildlife These parks and reserves are set apart to forever remain in contrast to those places where human activities technologies and developments prevail But even as the biodiversity crisis accelerates a growing number of voices are suggesting that protected areas are pass Conservation they argue should instead focus on lands managed for human use working landscapes and abandon the goal of preventing human caused extinctions in favor of maintaining ecosystem services to support people If such arguments take hold we risk losing support for the unique qualities and values of wild undeveloped nature Protecting the Wild offers a spirited argument for the robust protection of the natural world In it experts from five continents reaffirm that parks wilderness areas and other reserves are an indispensable albeit insufficient means to sustain species subspecies key habitats ecological processes and evolutionary potential Using case studies from around the globe they present evidence that terrestrial and marine protected areas are crucial for biodiversity and human well being alike vital to countering anthropogenic extinctions and climate change A companion volume to Keeping the Wild Against the Domestication of Earth Protecting the Wild provides a necessary addition to the conversation

about the future of conservation in the so called Anthropocene one that will be useful for academics policymakers and conservation practitioners at all levels from local land trusts to international NGOs

Strategic Opportunism: What Works in Africa Brian John Huntley, 2023-02-28 This open access book provides a synthesis of six projects across ten countries each of which have been sustained for two or more decades and which illustrate how success can be achieved regardless of systems of governance of a nation's wealth or of culture Detailed narratives are presented on the key personalities that have conceived conducted and concluded long term projects personal stories of vision failure frustration and persistence ultimately leading to success The case studies vary widely in their geography and goals The single handed commitment to re-discover the last surviving populations of Giant Sable in the miombo woodlands of central Angola through the capture translocation and establishment of robust breeding herds of this magnificent antelope contrasts with the massively funded three decade programme with over one hundred participants that reversed the annual loss to predation by feral cats of 455 000 seabirds from a sub Antarctic island Similarly the foresight of Zimbabwean and Namibian ecologists to place rural communities at the centre of conservation programmes by giving value to wildlife populations and benefits to local people transformed a land degradation problem to a socio ecological solution Across ten countries building capacity in botanical collection documentation and herbarium management expanded into a global project to place the knowledge base of Africa's flora onto an electronic data system accessible to researchers and conservation planners in even the most remote corners of the continent None of these projects enjoyed immediate results Each required leadership skills that combined vision a generosity of spirit fortuitous timing and the exploitation of unexpected opportunities

Tallamy,2020-02-04 From the New York Times bestselling author of Bringing Nature Home comes an urgent and heartfelt call for a new approach to conservation one that starts in every backyard Douglas W Tallamy s first book Bringing Nature Home awakened thousands of readers to an urgent situation wildlife populations are in decline because the native plants they depend on are fast disappearing His solution Plant more natives In this new book Tallamy takes the next step and outlines his vision for a grassroots approach to conservation Nature s Best Hope shows how homeowners everywhere can turn their yards into conservation corridors that provide wildlife habitats Because this approach relies on the initiatives of private individuals it is immune from the whims of government policy Even more important it s practical effective and easy you will walk away with specific suggestions you can incorporate into your own yard If you re concerned about doing something good for the environment Nature s Best Hope is the blueprint you need By acting now you can help preserve our precious wildlife and the planet for future generations Tallamy lays out all you need to know to participate in one of the great conservation projects of our time Read it and get started Elizabeth Kolbert Pulitzer Prize winning author of *The Sixth Extinction* *Darwin's Walk and The Last Wave* Richard Krooth,2017-08-30 This book describes the reasons humankind may be facing its last moments on Planet Earth Darwin marked the path of species evolution modification and extinction Following Darwin s trajectory of evolution the author reveals how human made technologies have had a devastating impact on Earth s biosphere signaling the continuing disappearance of landscapes and the decline of species life **Scientist** Richard Rhodes,2021-11-09 A masterful timely fully authorized biography of the great and hugely influential biologist and naturalist E O Wilson one of the most ground breaking and controversial scientists of our time from the Pulitzer Prize winning author of *The Making of the Atomic Bomb* An impressive account of one of the 20th century s most prominent biologists for whom the natural world is a sanctuary and a realm of boundless adventure the fewer the people in it the better The New York Times Book Review Few biologists in the long history of that science have been as productive as ground breaking and as controversial as the Alabama

born Edward Osborne Wilson At 91 years of age he may be the most eminent American scientist in any field Fascinated from an early age by the natural world in general and ants in particular his field work on them and on all social insects has vastly expanded our knowledge of their many species and fascinating ways of being This work led to his 1975 book Sociobiology which created an intellectual firestorm from his contention that all animal behavior including that of humans is governed by the laws of evolution and genetics Subsequently Wilson has become a leading voice on the crucial importance to all life of biodiversity and has worked tirelessly to synthesize the fields of science and the humanities in a fruitful way Richard Rhodes is himself a towering figure in the field of science writing and he has had complete and unfettered access to Wilson his associates and his papers in writing this book The result is one of the most accomplished and anticipated and urgently needed scientific biographies in years

Pandora's Box Geoffrey Newton, 2023-05-05 This book is about the coronavirus and the pandemic it spawned and what this outbreak means for future pandemics It analyses the official response and sees where improvements can be made for example the World Health Organization waited till March to designate the coronavirus a pandemic and a full year before confirming its airborne transmission The book looks at the specific nature of the virus its origins and how it was transmitted why it was so deadly to predisposed individuals how it compares to previous pandemics what measures were taken to mitigate the disease and how to protect ourselves against it in future The book also looks into the wider implications of the pandemic and its causes for example how climate change and biodiversity are coming into direct conflict with ever expanding needs of population growth and urban sprawl has conspired to bring us into ever closer contact with these viruses for example Nipah virus outbreak from the deforestation of the Indonesian Rain Forest and Ebola from settlement expansion in the Congo Lastly the book looks at the wider nature of viruses and their historical significance to the tree of life of the planet and their relationship to our evolution This book is a timely search into the nature of viruses and how they will affect us going forward and what measures we can take to protect ourselves and mitigate the dangers from future outbreaks by integrating our industrial society into an ecological friendly setting thereby accommodating these viruses

Die Hälfte der Erde Edward O. Wilson, 2016-09-26 Die Hälfte der Erdoberfläche der Natur zu überlassen das ist die Forderung des weltberühmten Biologen Edward O. Wilson Sein Buch ist das Testament eines großen Forschers und Schriftstellers der wie kein anderer erkannt hat dass der Mensch trotz aller unübersehbaren Fortschritte eine biologische Spezies bleibt die den für ihren Lebensbedingungen auf unserem Planeten besser angepasst ist als der Umwelt die wir gerade erschaffen Geschichte zu haben ist kein Privileg des Menschen Und dennoch ignorieren wir die Geschichten von Millionen anderen Arten die durch unser Verhalten vom Aussterben bedroht sind Wilson ist davon überzeugt dass wir nur dann den lebendigen Anteil unserer Umwelt retten und die für unser eigenes Überleben nötige Stabilität herstellen können wenn wir den halben Planeten zum Naturschutzgebiet erklären Wenn die Menschheit sich nicht sehr viel mehr Wissen über die globale Lebensvielfalt aneignet und sich nicht schnell dazu entschließt sie zu schützen dann werden wir schon bald die meisten Arten

in denen sich das Leben auf der Erde manifestiert unwiederbringlich verlieren Gorongosa Through the Lens Jean-Paul Vermeulen, 2021-07-10 Situated in the southernmost part of the Great Rift Valley of East Africa Gorongosa National Park is one of Mozambique's flagship conservation areas with a remarkable history From the ashes of the incredible human and wildlife tragedy that occurred during the years of civil war in the 1970s has arisen a conservation project of hope and inspiration In this book of artistic images and words Jean Paul Vermeulen reveals the beauty and fascination of this region These images were photographed in wild places that are easily accessible to anybody who wishes to travel there
