The most striking aspect of the book is its attention to the details of astronomical practice The Illustrated London Astronomy for the Use of Schools and Students John Russell Hind, 1853 A History of Ancient Mathematical Astronomy O. Neugebauer, 2012-12-06 From the reviews This monumental work will henceforth be the standard interpretation of ancient mathematical astronomy It is easy to point out its many virtues comprehensiveness and common sense are two of the most important Neugebauer has studied profoundly every relevant text in Akkadian Egyptian Greek and Latin no matter how fragmentary With the combination of mathematical rigor and a sober sense of the true nature of the evidence he has penetrated the astronomical and the historical significance of his material His work has been and will remain the most admired model for those working with mathematical and astronomical texts D Pingree in Bibliotheca Orientalis 1977 a work that is a landmark not only for the history of science but for the history of scholarship HAMA History of Ancient Mathematical Astronomy places the history of ancient Astronomy on a entirely new foundation We shall not soon see its equal N M Swerdlow in Historia Mathematica 1979 A Popular Handbook and Atlas of Astronomy Sir William Peck, 1891 **Astronomy for Amateurs** Camille Flammarion, 2008-01-01 The Science of Astronomy is sublime and beautiful Noble elevating consoling divine it gives us wings and bears us through Infinitude In these ethereal regions all is pure luminous and splendid Dreams of the Ideal even of the Inaccessible weave their subtle

spells upon us The imagination soars aloft and aspires to the sources of Eternal Beauty What greater delight can be conceived on a fine spring evening at the hour when the crescent moon is shining in the West amid the last glimmer of twilight than the contemplation of that grand and silent spectacle of the stars stepping forth in sequence in the vast Heavens All sounds of life die out upon the earth the last notes of the sleepy birds have sunk away the Angelus of the church hard by has rung the close of day But if life is arrested around us we may seek it in the Heavens These incandescing orbs are so many points of interrogation suspended above our heads in the inaccessible depths of space Gradually they multiply There is Venus the white star of the shepherd There Mars the little celestial world so near our own There the giant Jupiter The seven stars of the Great Bear seem to point out the pole while they slowly revolve around it What is this nebulous light that blanches the darkness of the heavens and traverses the constellations like a celestial path It is the Galaxy the Milky Way composed of millions on millions of suns The darkness is profound the abyss immense See Yonder a shooting star glides silently across the sky and disappears Who can remain insensible to this magic spectacle of the starry Heavens Where is the mind that is not attracted to these enigmas The intelligence of the amateur the feminine no less than the more material and prosaic masculine mind is well adapted to the consideration of astronomical problems Women indeed are naturally predisposed to these contemplative studies And the part they are called to play in the education of our children is so vast and so important that the elements of Astronomy might well be taught by the young mother herself to the budding minds that are curious about every issue whose first impressions are so keen and so enduring Astronomy ... Adam's Astronomy Jane S. Poole,2008-02-01 Long before Moses wrote Genesis the world's first astronomers invented star signs to illustrate a prophecy a God man would come to repair the breach between us and the Creator Those starry figures were pirated however and used to advance a false religion which spread all over the world Faithful men from Noah to the magi of the Christ child stood against that error yet the true star signs all but vanished for millennia Adam's Astronomy lays out the original signs introduces the linguist who recovered them and explains how she did it The last chapter describes many deep sky objects whose traits revealed by modern telescopes illustrate the ancient message of the constellations in which they are found
