Bbc News Queens Speech:

Migration and the Crisis of the Modern Nation State? Frank Jacob, Adam Luedtke, 2018-01-15 The anthology explores the interrelationship between migration and a supposedly existent crisis of the modern nation state The argument of such a crisis is mainly used by the New Right to stimulate nationalist feelings and provoke hate and aggression We in contrast to this perception argue that from a historical and current perspective migration is not endangering the nation state but rather changing the idea of a nation itself by redefining it In historical as well as current case studies the authors determine the political dangers of right wing demagogues while emphasizing the chances immigration is offering the progress of the nation state While it will be discussed how nationalism is impacting on the perception of migration we also want to emphasize how it is perceived by the people in the specific regions which are either confronted with migration or those which are not The authors for the volume come from different fields namely history and political sciences and are consequently able to offer the reader a broad insight into the historical roots and the current consequences nationalism had or has on the perception and the local as well as global policies towards migration The analysis of particular immigrant groups e g North Koreans in post war Korea South Asians in the Emirates Middle Eastern refugees in Europe Hispanics in the United States as well as a close reading of crisis related media newspapers and other media in Europe and the US will all in all establish a broad perspective due to which the reader will be able to compare and connect the national events to a larger global picture **Your**

Christmas and the British: A Modern History Martin Johnes,2016-10-06

The modern Christmas was made by the Victorians and rooted in their belief in commerce family and religion Their rituals and traditions persist to the present day but the festival has also been changed by growing affluence shifting family structures greater expectations of happiness and material comfort technological developments and falling religious belief Christmas became a battleground for arguments over consumerism holiday entitlements social obligations communal behaviour and the influence of church state and media Even in private it encouraged reflection on social change and the march of time Amongst those unhappy at the state of the world or their own lives Christmas could induce much cynicism and even loathing but for a quieter majority it was a happy time a moment of a joy in a sometimes difficult world that made the festival more than just an integral feature of the calendar

Christmas was one of British culture's emotional high points. Moreover, it was also a testimony to the enduring importance of family, shared values, and a common culture in the UK. Martin Johnes shows how Christmas and its traditions have been lived, adapted, and thought about in Britain since 1914. Christmas and the British is about the festival's social, cultural, and economic functions and its often forgotten status as both the most unusual and important day of the year.

Peace Settlements and Political Transformation in Divided Societies Adrian Guelke, 2022-10-03. *Peace Settlements and Political Transformation in Divided Societies* examines what happened to Northern Ireland and South Africa after their miraculous political settlements in the 1990s, in which comparison between the two cases played a small but significant role. The author extends the story by exploring the connections between these two deeply divided societies during the consolidation of their settlements. He shows the ways in which their paths have subsequently diverged in both reality and perception. At the outset of the transformation of the two polities, the similarities between the two cases tended to be overstated. In this context, the book explains how the South African case came to be misidentified as an example of consociationalism and the influence that this has continued to exert on comparative studies of power sharing. In the process, other aspects of South Africa's political transformation, including respect for the constitution and the rule of law, have been overlooked and underappreciated. In the case of Northern Ireland, a missing element in the treatment of its settlement as a model for other deeply divided societies has been the role that external mediation played in the creation and survival of its institutions. Northern Ireland's dependence on favourable external circumstances explains in large part why the Good Friday Agreement is now facing a threat to its survival. By contrast, South Africa's political institutions seem relatively secure despite the vast scale of the country's socio-economic problems. This book will be of interest to students, researchers, and scholars of conflict resolution and peace processes, comparative politics, ethnic politics, and democratisation, as well as those involved in the governance of deeply divided societies.

Citizens and borderwork in contemporary Europe Chris Rumford, 2013-10-31. The extent to which ordinary people can construct, shift, and dismantle borders is seriously neglected in the existing literature. The book explores the ability of citizens to participate in the making of borders and the empowerment that can result from this bordering and debordering activity. Borderwork is the name given to the ways in which ordinary people can make and unmake borders. Borderwork is no longer only the business of nation-states; it is also the business of citizens and indeed non-citizens. This study of borderwork extends the recent interest in forms of bordering which do not necessarily occur at the state's external borders. However, the changing nature of borders cannot be reduced to a shift from the edges to the interior of a polity. To date, little research has

been conducted on the role of ordinary people in envisioning constructing maintaining shifting and erasing borders creating borders which facilitate mobility for some while creating barriers to mobility for others appropriating the political resources which bordering offers contesting the legitimacy of or undermining the borders imposed by others This book makes an original contribution to the literature and stands to set the agenda for a new dimension of border studies This book was published as a special issue of Space and Polity
