Games, Gambling, and Probability

David G. Taylor, 2021-06-22 Many experiments have shown the human brain generally has very serious problems dealing with probability and chance A greater understanding of probability can help develop the intuition necessary to approach risk with the ability to make more informed and better decisions The first four chapters offer the standard content for an introductory probability course albeit presented in a much different way and order The chapters afterward include some discussion of different games different ideas that relate to the law of large numbers and many more mathematical topics not typically seen in such a book The use of games is meant to make the book and course feel like fun Since many of the early games discussed are casino games the study of those games along with an understanding of the material in later chapters should remind you that gambling is a bad idea you should think of placing bets in a casino as paying for entertainment Winning can obviously be a fun reward but should not ever be expected Changes for the Second Edition New chapter on Game Theory New chapter on Sports Mathematics The chapter on Blackjack which was Chapter 4 in the first edition appears later in the book Reorganization has been done to improve the flow of topics and learning New sections on Arkham Horror Uno and Scrabble have been added Even more exercises were added The goal for this textbook is to complement the inquiry based learning movement In my mind concepts and ideas will stick with the reader more when they are motivated in an interesting way Here we use questions about various games not just casino games to motivate the mathematics and I would say that the writing emphasizes a just in time mathematics approach Topics are presented mathematically as questions about the games themselves are posed Table of Contents Preface 1 Mathematics and Probability 2 Roulette and Craps Expected Value 3 Counting Poker Hands 4 More Dice Counting and Combinations and Statistics 5 Game Theory Poker Bluffing and Other Games 6 Probability Stochastic Matrices Board Game Movement 7 Sports Mathematics Probability Meets Athletics 8 Blackjack Previous Methods Revisited 9 A Mix of Other Games 10 Betting Systems Can You Beat the System 11 Potpourri Assorted Adventures in Probability Appendices Tables Answers and Selected Solutions Bibliography Biography Dr David G Taylor is a professor of mathematics and an associate dean for academic affairs at
