Children, Childhood, and the Future Andrea Kleeberg-Niepage,2020-01-10 Although most of the world s children live in the Global South much of the corpus of scientific knowledge which forms the basis of the current notion of good childhood worldwide is drawn from research on Western middle class children Even cross cultural research often applies the Western model of childhood as the standard to which others must correspond This volume serves to bridge this gap by both bringing up significant features of the development and socialisation of children in African countries and presenting cross cultural procedures which help to discuss and develop differentiated and joint ideas about childhood instead of implementing one sided standards which are disconnected from most children s lives

Adaptation to Climate Change and Variability in Rural West Africa Joseph A. Yaro, Jan Hesselberg, 2016-04-12 This book presents conceptual and empirical discussions of adaptation to climate change variability in West Africa Highlighting different countries experiences in adaptation by different socio economic groups and efforts at building their adaptive capacity it offers readers a holistic understanding of adaptation on the basis of contextual and generic sources of adaptive capacity Focusing on adaptation to climate change variability is critical because the developmental challenges West Africa faces are increasingly intertwined with its climate history Today climate change is a major developmental issue for agrarian rural communities with high percentages of the population earning a living directly or indirectly from the natural environment This makes them highly vulnerable to climate driven ecological change in addition to threats in the broader political economic context It is imperative that rural people adapt to climate change but their ability to successfully do so may be limited by competing risks and vulnerabilities As such elucidating those vulnerabilities and sources of strength with regard to the adaptive capacities needed to support successful adaptation and avoid maladaptation is critical for future policy formulation Though the empirical discussion is geographically based on West Africa its applicability in terms of the processes structures needs strategies and recommendations for policy transcends the region and provides useful lessons for understanding adaptation broadly in the developing world

health practitioners and students all can benefit from this book's insights and coverage **Implementing Data Analytics and Architectures for Next Generation Wireless Communications** Bhatt, Chintan, Kumar, Neeraj, Bashir, Ali

Kashif, Alazab, Mamoun, 2021-08-13 Wireless communication is continuously evolving to improve and be a part of our daily communication. This leads to improved quality of services and applications supported by networking technologies. We are now able to use LTE, LTE Advanced and other emerging technologies due to the enormous efforts that are made to improve the quality of service in cellular networks. As the future of networking is uncertain, the use of deep learning and big data analytics is a point of focus as it can work in many capacities at a variety of levels for wireless communications. *Implementing Data Analytics and Architectures for Next Generation Wireless Communications* addresses the existing and emerging theoretical and practical challenges in the design, development and implementation of big data algorithms, protocols, architectures and applications for next generation wireless communications and their applications in smart cities. The chapters of this book bring together academics and industrial practitioners to exchange, discuss and implement the latest innovations and applications of data analytics in advanced networks. Specific topics covered include key encryption techniques, smart home appliances, fog communication networks and security in the internet of things. This book is valuable for technologists, data analysts, networking experts, practitioners, researchers, academicians and students. *Circular Economy and Green*

Transition in the Global South Anwesha Borthakur, Pardeep Singh, 2025-09-26 This book is an attempt to address circular economy and green transition potentials and implications with a particular focus on the Global South. Circular economy and green transition have been central themes of environmental policymaking during the recent decades both in the Global North and the Global South. However, the focus and attention on the topics among the research community have been relatively recent in the emerging economies and developing countries in the Global South. The term circular economy refers to an economic model that aims to minimize waste, make the most of resources and promote sustainability throughout the entire lifecycle of products and materials. Unlike the traditional linear economy which follows a take-make-dispose pattern, the circular economy seeks to create a closed-loop system where resources are reused and recycled. The term green transition, on the other hand, refers to a comprehensive and systemic shift from an economy that heavily relies on fossil fuels and environmentally destructive practices to one that is sustainable, eco-friendly and focused on addressing global climate change implications. Green transition is often considered as a critical approach to achieve a sustainable future and mitigate the adverse impacts of climate change. Circular economy and the green transition are complementary approaches that when integrated can lead to a robust sustainable global economy. Both concepts acknowledge the interconnectedness of environmental, economic and social facets and highlight the significance of a systematized change to achieve a better future. We can consider circular economy as a subset of green transition where both share the overarching goal of fostering sustainability and mitigating detrimental environmental impacts. **Neutrosophic Sets and Systems, Vol. 27, 2019**
