## **Stonehenge As Above So Below By Paul D Burley:**

**Stonehenge** Paul D. Burley, 2014-03 Paul D Burley's *Stonehenge As Above So Below* is a game changer. This book identifies the original design and purpose of the Stonehenge Ritual Landscape. It will change your understanding of the people who built the first and largest monument and many other mid Neolithic structures that remain vital to the functioning of this sacred landscape. You will discover the Stonehenge Landscape is the oldest and best preserved example of astronomically related sacred symbolism ever constructed. In addition, Burley describes the purpose of heretofore enigmatic megalithic Stonehenge. His discovery was made while researching the objective of four stones inside the henge yet unnoticed by thousands of people viewing the monument each day. They are the Station Stones. Overshadowed by circles of much larger stones, the Station Stones justify the entire monument itself. They are the key to understanding the annual conception of new life by Earth Goddess and Sky King. *Stonehenge As Above So Below* includes more than 90 illustrations. It is a major breakthrough unveiling a new paradigm for how Stonehenge was used 5500 years ago and how we should view it today. Paul D Burley is a researcher of ancient and indigenous symbolism. His experience includes almost 30 years as a registered engineer and environmental geologist. He is the author of *The Sacred Sphere*. The best book on Stonehenge I have read for a very long time. Fresh and original throughout, thoroughly researched, convincing and thought provoking. *Stonehenge As Above So Below* opens new doors on the magic and the mystery of our most ancient past. Graham Hancock, Author *Fingerprints of the Gods*. Intellectual and Spiritual Expression of Non-Literate Peoples Emmanuel Anati, 2016-02-08 Proceedings of the session Intellectual and Spiritual Expression of Non-literate Peoples part of the XVII World UISPP Congress held in Burgos 2014. The session brought together experts from various disciplines to share experience and scientific approaches for a better understanding of human creativity and behaviour in prehistory. *The Builder*, 1906 *Building*, 1906 **The**

**Stonehenge Codes** David P. Gregg, 2014 What was the motivation behind the development of Stonehenge over 1500 years? Was it a ceremonial site dedicated to the ancestors, a currently fashionable view? Was it a communal necropolis? An exercise in sophisticated geometry? A calendar for tracking the seasons and longer celestial cycles? A calculator for predicting eclipses? Perhaps at various times it was all these things. Now Professor Gregg has gone back to reassess the design of the site and discovered many startling and unexpected patterns. The same triangle and polygon geometry was used to scale monument features over the full 1500 year history. Feature dimensions and proportions reflect key cycles of the Sun and Moon as do stone counts. As a control, the professor analyses the gear trains of the 2nd century BC Antikythera astronomical computer and finds the same often prime numbers in play. Where the Antikythera device used rotating gears for its calculations, Stonehenge used fixed stones and rotating priests. Remarkably, the same numbers turn up in Greek and Egyptian numerical myths and European folk memories speak of dancing stones or priests and taboos on ordinary mortals counting or moving stones at megalithic sites. It also turns out that the geometry used and the astronomical cycles modelled have close

connections to pi and phi the Golden Section in remarkable ways Could it be that the designers of Stonehenge recognised these strange coincidences between earthly geometry the great irrational numbers like phi and key celestial cycles As above so below Did these strange coincidences inspire the builders to record them in stone and perhaps to worship ceremonial and ritual there Did they feel the gods were speaking to them The professor also examines the case for the infamous megalithic yard and finds much convincing new evidence for its existence including its close and simple scaling relationships of several established ancient metrics These close relationships hinder the identification of which units were used at sites like Stonehenge Underlying all these metrics the professor sees a possible origin in geodetic scaling Remarkably at Stonehenge and many other ancient sites feature dimensions often are in simple fractions of seconds of arc This occurs at levels hard to attribute to chance He concludes reluctantly that at some early date before the unification of Egypt one or more cultures accurately measured the size of the Earth This geodetic measure was then used to calibrate primitive metrics based on human proportions probably through early trade links The professor concludes from all this material that our models of intellectual and scientific development are wrong and that we have greatly underestimated what can be done with simple technology as the astronomical knowledge of the Greeks Babylonians and the Maya show us Just how much have we forgotten
