The 10000 Year Explosion How Civilization Accelerated Human Evolution By Gregory Cochran:

The 10,000 Year Explosion Gregory Cochran, Henry Harpending, 2009 Two leading researchers make the controversial argument that the human species is still measurably evolving in important ways in fact faster than ever before **Evolving Brains, Emerging Gods** E. Fuller Torrey, 2017-09-05 Religions and mythologies from around the world teach that God or gods created humans Atheist humanist and materialist critics meanwhile have attempted to turn theology on its head claiming that religion is a human invention In this book E Fuller Torrey draws on cutting edge neuroscience research to propose a startling answer to the ultimate question *Evolving Brains Emerging Gods* locates the origin of gods within the human brain arguing that religious belief is a by product of evolution Based on an idea originally proposed by Charles Darwin Torrey marshals evidence that the emergence of gods was an incidental consequence of several evolutionary factors Using data ranging from ancient skulls and artifacts to brain imaging primatology and child development studies this book traces how new cognitive abilities gave rise to new behaviors For instance autobiographical memory the ability to project ourselves backward and forward in time gave *Homo sapiens* a competitive advantage However it also led to comprehension of mortality spurring belief in an alternative to death Torrey details the neurobiological sequence that explains why the gods appeared when they did connecting archaeological findings including clothing art farming and urbanization to cognitive developments This book does not dismiss belief but rather presents religious belief as an inevitable outcome of brain evolution Providing clear and accessible explanations of evolutionary neuroscience *Evolving Brains Emerging Gods* will shed new light on the mechanics of our deepest mysteries Fitness for Geeks Bruce W. Humanity's End Nicholas Agar, 2013-08-16 An argument that achieving millennial life spans or monumental intellects will destroy values that give meaning to human lives Proposals to make us smarter than the greatest geniuses or to add thousands of years to our life spans seem fit only for the spam folder or trash can And yet this is what contemporary advocates of radical enhancement offer in all seriousness They present a variety of technologies and therapies that will

expand our capacities far beyond what is currently possible for human beings In *Humanity's End* Nicholas Agar argues against radical enhancement describing its destructive consequences Agar examines the proposals of four prominent radical enhancers Ray Kurzweil who argues that technology will enable our escape from human biology Aubrey de Grey who calls for anti aging therapies that will achieve longevity escape velocity Nick Bostrom who defends the morality and rationality of enhancement and James Hughes who envisions a harmonious democracy of the enhanced and the unenhanced Agar argues that the outcomes of radical enhancement could be darker than the rosy futures described by these thinkers The most dramatic means of enhancing our cognitive powers could in fact kill us the radical extension of our life span could eliminate experiences of great value from our lives and a situation in which some humans are radically enhanced and others are not could lead to tyranny of posthumans over humans

Reading Human Nature Joseph Carroll, 2011-03-01 As the founder and leading practitioner of literary Darwinism Joseph Carroll remains at the forefront of a major movement in literary studies Signaling key new developments in this approach *Reading Human Nature* contains trenchant theoretical essays innovative empirical research sweeping surveys of intellectual history and sophisticated interpretations of specific literary works including *The Picture of Dorian Gray* *Wuthering Heights* *The Mayor of Casterbridge* and *Hamlet* Evolutionists in the social sciences have succeeded in delineating basic motives but have given far too little attention to the imagination Carroll makes a compelling case that literary Darwinism is not just another school or movement in literary theory It is the moving force in a fundamental paradigm change in the humanities a revolution Psychologists and anthropologists have provided massive evidence that human motives and emotions are rooted in human biology Since motives and emotions enter into all the products of a human imagination humanists now urgently need to assimilate a modern scientific understanding of human nature Integrating evolutionary social science with literary humanism Carroll offers a more complete and adequate understanding of human nature

Suprahumanism Daniel S. Forrest, 2014-08-09 We are at a crucial point in time a moment of transition as important as the emergence of *Homo sapiens* or the beginning of civilisation after the Neolithic Revolution Paradoxically the triumph of the West also called globalisation means the death of Europe and European man Our destiny hangs between two options either to complete the triumph of the egalitarian conception of the world which will bring about the end of history or to promote a historical regeneration Nietzsche prophesied that the Earth will eventually belong to either the last man or to the superman There are no other alternatives

The Human Condition Stefan Wurm, 2020-03-10 Over a very short period only a few hundred years our understanding of the cosmos our planet Earth the evolution of life on it and the beginnings of our very own human endeavor have radically changed These revolutions in science and technology have dramatically altered our societies in many ways For quite some time it seemed as if our planet's resources were unlimited Today we know that this is not the case Human civilizations are shaping our planet's future in ways that have profound consequences for all other life on Earth as well as for us We need to reflect broadly on what defines our human condition if

we wish our societies to be successful in navigating a future that cannot be just ours but must include the broad diversity of life on Earth without which humankind will not survive This book tells the story of how we discovered the universe how we learned about our planet and the life evolving on it how humanity emerged from pre history and what some of the future of our civilizations could hold

Big History and the Future of Humanity Fred Spier, 2015-05-06 big history and the future of humanity This remains the best single attempt to theorize big history as a discipline that can link core concepts and paradigms across all historical disciplines from cosmology to geology from biology to human history With additional and updated material the Second Edition also offers a fine introduction to the history of big history and a superb introductory survey to the big history story Essential reading for anyone interested in a rapidly evolving new field of scholarship that links the sciences and the humanities into a modern science based origin story David Christian Macquarie University Notable for its theoretic approach this new Second Edition is both an indispensable contribution to the emerging big history narrative and a powerful university textbook Spier defines words carefully and recognizes the limits of current knowledge aspects of his own clear thinking Cynthia Brown Emerita Dominican University of California Reflecting the latest theories in the sciences and humanities this new edition of Big History and the Future of Humanity presents an accessible and original overview of the entire sweep of history from the origins of the universe and life on Earth up to the present day Placing the relatively brief period of human history within a much broader framework one that considers everything from vast galaxy clusters to the tiniest sub atomic particles big history is an innovative theoretical approach that opens up entirely new multidisciplinary research agendas Noted historian Fred Spier reveals how a thorough examination of patterns of complexity can offer richer insights into what the future may have in store for humanity The second edition includes new learning features such as highlighted scientific concepts an illustrative timeline and comprehensive glossary By exploring the cumulative history from the Big Bang to the modern day Big History and the Future of Humanity Second Edition sheds important historical light on where we have been and offers a tantalizing glimpse of what lies ahead Militant Christianity

A. Kehoe, 2012-11-26 A powerful chronicle of the astounding persistence of Indo European glorification of battle morphed into today's militant Christian Right The book is written as a lively chronicle making clear the astounding power of the ancient cultural tradition embedding our language and the real battle we face to contain this Christian jihad

The Intelligence Paradox Satoshi Kanazawa, 2012-03-28 A book that challenges common misconceptions about the nature of intelligence Satoshi Kanazawa's Why Beautiful People Have More Daughters written with Alan S Miller was hailed by the Los Angeles Times as a rollicking bit of pop science that turns the lens of evolutionary psychology on issues of the day That book answered such burning questions as why women tend to lust after males who already have mates and why newborns look more like Dad than Mom Now Kanazawa tackles the nature of intelligence what it is what it does what it is good for if anything Highly entertaining smart dare we say intelligent and daringly contrarian The Intelligence Paradox will provide a

deeper understanding of what intelligence is and what it means for us in our lives Asks why more intelligent individuals are not better and are in fact often worse than less intelligent individuals in solving some of the most important problems in life such as finding a mate raising children and making friends Discusses why liberals are more intelligent than conservatives why atheists are more intelligent than the religious why more intelligent men value monogamy why night owls are more intelligent than morning larks and why homosexuals are more intelligent than heterosexuals Explores how the purpose for which general intelligence evolved solving evolutionarily novel problems allows us to explain why intelligent people have the particular values and preferences they have Challenging common misconceptions about the nature of intelligence this book offers surprising insights into the cutting edge of science at the intersection of evolutionary psychology and intelligence research

The Social Contract ,2008 *Why Horror Seduces* Mathias F. Clasen,2017 Why do humans feel the need to scream at horror films In *Why Horror Seduces* author Matthias Clasen looks to evolutionary social science to show how the horror genre is a product of human nature

Darwin's Bridge Joseph Carroll,Dan P. McAdams,Edward O. Wilson,2016 *Darwin's Bridge* Uniting the Humanities and Sciences explores the meaning of consilience and considers the unity of human evolution human nature social dynamics art and narrative Bringing together cutting edge scientists and scholars across a range of fields of knowledge production this volume makes it possible to see how far we have come toward unifying knowledge about the human species what major issues are still in contention and what areas of research are likely to produce further progress

The Evolutionary History of Witch-hunting Steije Hofhuis,2024-12-06 Why did early modern Europeans hunt for witches Were these persecutions a shrewd tool to oppress women or the poor or were they just a way of making money Or were witch hunters primarily driven by a genuine belief in witchcraft The witches sabbath the diabolical pact and the nightly flight were elements in the early modern concept of witchcraft that seem to have been intelligently designed to trigger persistent witch persecutions But in contrast to what many past historical scholars presumed witch hunts were not based on intelligent design So how to explain them This book proposes a new model Darwinian cultural evolution It contends that witch hunting's apparent design emerged from a hidden evolutionary process in which cultural variants which accidentally unleashed larger persecutions were cumulatively preserved Witch hunting did not so much evolve to serve human interests but to ensure its own selfish reproduction Historians have often compared witch persecutions to the outbreaks of contagious disease but only as a figure of speech But shouldn't we take the similarities more seriously This book argues that witch hunting was a cultural virus that spread at the expense of its human hosts and thus bridges the gap between qualitative history and the burgeoning field of Darwinian cultural evolution

Cognitive Sciences and Medieval Studies Juliana Dresvina,Victoria Blud,2020-11-01 This study brings together medieval studies and cognitive methodologies in a study

specifically aimed at medievalists It presents a longer history of certain mental health conditions and locates contemporary debates about the mind in a broader historical framework It considers both the benefits of incorporating insights from contemporary neuroscientific and cognitive studies into the exploration of the past and the benefits of employing historical models and case studies in order to reflect on modern methods

Humans Versus Nature Daniel R. Headrick, 2020 Since the appearance of Homo sapiens on the planet hundreds of thousands of years ago human beings have

sought to exploit their environments extracting as many resources as their technological ingenuity has allowed As technologies have advanced in recent centuries that impulse has remained largely unchecked exponentially accelerating the human impact on the environment Humans versus Nature tells a history of the global environment from the Stone Age to the present emphasizing the adversarial relationship between the human and natural worlds Nature is cast as an active protagonist rather than a mere backdrop or victim of human malfeasance Daniel R Headrick shows how environmental changes epidemics climate shocks and volcanic eruptions have molded human societies and cultures sometimes overwhelming them At the same time he traces the history of anthropogenic changes in the environment species extinctions global warming deforestation and resource depletion back to the age of hunters and gatherers and the first farmers and herders He shows how human interventions such as irrigation systems over fishing and the Industrial Revolution have in turn harmed the very societies that initiated them Throughout Headrick examines how human driven environmental changes are interwoven with larger global systems dramatically reshaping the complex relationship between people and the natural world In doing so he roots the current environmental crisis in the deep past
