The Arabian Nights By Anonymous:

The Arabian Nights Entertainments by Anonymous, 2017-11-11 The Arabian Nights was introduced to Europe in a French translation by Antoine Galland in 1704 and rapidly attained a unique popularity There are even accounts of the translator being roused from sleep by bands of young men under his windows in Paris importuning him to tell them another story The learned world at first refused to believe that M Galland had not invented the tales But he had really discovered an Arabic manuscript from sixteenth century Egypt and had consulted Oriental story tellers In spite of inaccuracies and loss of color his twelve volumes long remained classic in France and formed the basis of our popular translations A more accurate version corrected from the Arabic with a style admirably direct easy and simple was published by Dr Jonathan Scott in 1811 This is the text of the present edition The Moslems delight in stories but are generally ashamed to show a literary interest in fiction Hence the world's most delightful story book has come to us with but scant indications of its origin Critical scholarship however has been able to reach fairly definite conclusions The reader will be interested to trace out for himself the similarities in the adventures of the two Persian queens Scheherazade and Esther of Bible story which M de Goeje has pointed out as indicating their original identity Encyclopædia Britannica Thousand and One Nights There are two or three references in tenth century Arabic literature to a Persian collection of tales called The Thousand Nights by the fascination of which the lady Scheherazade kept winning one more day's lease of life A good many of the tales as we have them contain elements clearly indicating Persian or Hindu origin But most of the stories even those with scenes laid in Persia or India are thoroughly Mohammedan in thought feeling situation and action

Translation and the Manipulation of Difference

Tarek Shamma, 2014-06-03 Translation and the Manipulation of Difference explores the question of difference in translation and offers an extended critique of the advocacy of foreignizing translation as a practice

that does not minimize the alterity of the foreign text and could therefore serve as an antidote to ethnocentrism and cultural insularity Shamma examines the reception of Arabic literature especially the Arabian Nights in nineteenth century England and offers a detailed analysis of the period's major translations from Arabic by Edward Lane Richard Burton and Wilfred Blunt He demonstrates that the long complicated history of interaction often confrontation between Europe and the Arab World where misrepresentations of the Other were intricately embroiled with political struggles provides a critical position from which to examine the crucial role of context above and beyond the textual elements of the translation in shaping the political effects of translation Examining translation techniques and decisions in the context of the translators own goals as well as the conditions that surrounded the reception of their work the study shows how each translator manipulated his original in line with political positions that ranged from implicit acquiescence to steadfast resistance to colonialism In a carefully elaborated critique of totalizing positions the author argues that the foreignizing domesticating model is too limited to describe the social and political function of translation and calls for a more complex understanding of the sociopolitical dimensions of translation strategies The Arabian Nights in Contemporary World Cultures Muhsin J.
