But the book is also funny and conversational in tone and an excellent tribute to a beloved author. Booklist Affable and consistently engaging Burrows's buoyant pun peppered and aptly footnote flecked style helpfully marries his subject matter propelling us through decade after decade of a heavily writing-centric life while illuminating Pratchett's complexities and contradictions without any drag in the tempo. Locus Magazine An impressively comprehensive engagingly written biography SFX

Terry Pratchett's Ethical Worlds Kristin Noone, Emily Lavin Leveret, 2020-08-05 Terry Pratchett's writing celebrates the possibilities opened up by inventiveness and imagination. It constructs an ethical stance that values informed and self-aware choices, knowledge of the world in which one makes those choices, the importance of play and humor in crafting a compassionate worldview, and acts of continuous self-examination and creation. This collection of essays uses inventiveness and creation as a thematic core to combine normally disparate themes such as science fiction, studies of the effect of collaborative writing and shared authorship, steampunk aesthetics, productive modes of ownership, intertextuality, neomedievalism, and colonialism, adaptations into other media, linguistics, and rhetorics, and coming of age as an act of free will.

The Discworld by Terry Pratchett Alexander Asper-Nelson, 2000 An Unofficial Companion to the Novels of Terry Pratchett Andrew M. Butler, 2007 Entries on plot lines and characters, articles on key themes and discussions of artwork, television adaptations, and collaborative work make this the most comprehensive, fascinating, and illuminating companion to the work of Terry Pratchett, one of our most entertaining and greatest writers. Subcreation: Fictional-World Construction from J.R.R. Tolkien to Terry Pratchett and Tad Williams Stefanie Schult, 2017-01-26 The doctoral thesis argues that the term Subcreation, with its revised and broadened definition in part differing from J.R.R. Tolkien's original term sub-creation, may be used for the discussion of the making of fictional worlds in literary discourse. The successful conception of a fictional world depends on the reader's willing suspension of disbelief. This depends both on the author and his skilled composition of the world and all its aspects, as well as on the reader's acceptance of this invented fictional world. The author needs to create a narrative with an inner consistency which is crucial to achieving the effect of the reader's immersion in the fictional world. The fundamental aspects that an author needs to realize to achieve successful Subcreation have been structured into and analysed in four categories: Language and Linguistic Variation, Physiopoeia, Anthropoeia, and Mythopoeia. Furthermore, this thesis shows that, as contemporary examples of fantastic literature, both Tad Williams's and Terry Pratchett's fictional worlds are successfully created through the realization of these aspects of Subcreation. Apart from commenting on the success of the subcreative process, this thesis also remarks upon the cultural influences both authors include in their writings. While both may be considered Anglophone in a general categorization, Pratchett's Discworld retains a feeling of Britishness that is not to be

found in Williams's *Otherland* The thesis proposes several approaches to Subcreation that may be studied subsequently So for example it may be possible to determine the success of an author's Subcreation by collecting empirical data Apart from literary works this field of studies may also include other media *Paperback Inferno Index* Kevin R. Space Elevator Fouad Sabry, 2022-10-25 What Is Space Elevator One concept for a transportation system that would link planets to space is called a space elevator A cable that is attached to the surface and extends into space would be the

primary component of this system Without the need for huge rockets the architecture of the system would enable vehicles to ascend the cable from the surface of a planetary body such as the surface of the Earth and enter orbit directly Because of the enormous weight a space elevator based on Earth could not simply be a tall tower supported from below Instead it would consist of a cable with one end attached to the surface near the equator and the other end attached to a counterweight in space beyond geostationary orbit This would allow the elevator to move between the surface and the counterweight The opposing forces of gravity which is stronger at the lower end and the upward centrifugal force which is stronger at the upper end would result in the cable being held up under tension and stationary over a single position on Earth Gravity is stronger at the lower end while the upward centrifugal force is stronger at the upper end After the tether has been deployed climbers will be able to use mechanical methods to repeatedly ascend and descend the tether in order to release their payload into and out of orbit
