The Chronoliths Robert Charles Wilson, 2012-12-21 Scott Warden is a man haunted by the past and soon to be haunted by the future In early twenty first century Thailand Scott is an expatriate slacker Then one day he inadvertently witnesses an impossible event the violent appearance of a 200 foot stone pillar in the forested interior Its arrival collapses trees for a quarter mile around its base freezing ice out of the air and emitting a burst of ionizing radiation It appears to be composed of an exotic form of matter And the inscription chiseled into it commemorates a military victory sixteen years in the future Shortly afterwards another larger pillar arrives in the center of Bangkok obliterating the city and killing thousands Over the next several years human society is transformed by these mysterious arrivals from seemingly our own near future Who is the warlord Kuin whose victories they note Scott wants only to rebuild his life But some strange look of causality keeps drawing him in to the central mystery and a final battle with the future

Blind Lake Robert Charles Wilson, 2013-08-29 Robert Charles Wilson says The New York Times writes superior science fiction thrillers His Darwinia won Canada s Aurora Award his most recent novel *The Chronoliths* won the prestigious John W Campbell Memorial Award Now he tells a gripping tale of alien contact and human love in a mysterious but hopeful universe At Blind Lake a large federal research installation in northern Minnesota scientists are using a technology they barely understand to watch everyday life in a city of lobster like aliens upon a distant planet They can t contact the aliens in any way or understand their language All they can do is watch Then without warning a military cordon is imposed on the Blind Lake site All communication with the outside world is cut off Food and other vital supplies are delivered by remote control No one knows why The scientists nevertheless go on with their research Among them are Nerissa Iverson and the man she recently divorced Raymond Scutter They continue to work together despite the difficult conditions and the bitterness between them Ray believes their efforts are doomed that culture is arbitrary and the aliens will forever be an

enigma Nerissa believes there is a commonality of sentient thought and that our failure to understand is our own ignorance not a fact of nature The behavior of the alien she has been tracking seems to be developing an elusive narrative logic and she comes to feel that the alien is somehow impossibly aware of the project's observers But her time is running out Ray is turning hostile stalking her The military cordon is tightening Understanding had better come soon Blind Lake is a 2004 Hugo Award Nominee for Best Novel

Masculinity in Contemporary Science Fiction by Men Sara Martín, 2025-05-30 Masculinity in Contemporary Science Fiction by Men No Plans for the Future is the first comprehensive study of the self representation of men in SF novels published in the twenty first century by male authors Exploring a broad selection of writers and works the fourteen chapters present a panoramic overview of men's contributions to current SF and explore their slow but noticeable progress in the representation of gender The impact of feminism and gender studies and the demands of readers have profoundly transformed men's SF which now presents far more caring and vulnerable male characters The old stereotypes are being replaced by a collective reflection on how men and masculinity are changing though the lack of a common agenda results in novels that while exciting and often challenging sometimes miss the chance to imagine a better anti patriarchal pro feminist future for men and for all human beings The authors analysed include Robert Charles Wilson Geoff Ryman Samuel R Delany Richard K Morgan John Scalzi Iain M Banks Ernest Cline James S A Corey Colson Whitehead Andy Weir Daniel H Wilson Ian McDonald Yoon Ha Lee Tade Thompson Neal Stephenson and Kim Stanley Robinson

history and the future of science fiction and the way it is taught and studied Science Fact and Science Fiction Brian
Stableford, 2006-09-06 Science fiction is a literary genre based on scientific speculation Works of science fiction use the ideas
and the vocabulary of all sciences to create valid narratives that explore the future effects of science on events and human
beings Science Fact and Science Fiction examines in one volume how science has propelled science fiction and to a lesser
extent how science fiction has influenced the sciences Although coverage will discuss the science behind the fiction from the
Classical Age to the present focus is naturally on the 19th century to the present when the Industrial Revolution and
spectacular progress in science and technology triggered an influx of science fiction works speculating on the future As
scientific developments alter expectations for the future the literature absorbs uses and adapts such contextual visions The
goal of the Encyclopedia is not to present a catalog of sciences and their application in literary fiction but rather to study the
ongoing flow and counterflow of influences including how fictional representations of science affect how we view its practice
and disciplines Although the main focus is on literature other forms of science fiction including film and video games are
explored and because science is an international matter works from non English speaking countries are discussed as needed

Pure Strategy Everett Dolman, 2012-11-12 A stimulating new inquiry into the fundamental truth of strategy its purpose

place utility and value This new study is animated by a startling realization the concept of strategic victory must be summarily discarded This is not to say that victory has no place in strategy or strategic planning The outcome of battles and campaigns are variables within the strategist's plan but victory is a concept that has no meaning there To the tactical and operational planner wars are indeed won and lost and the difference is plain Success is measurable failure is obvious In contrast the pure strategist understands that war is but one aspect of social and political competition an ongoing interaction that has no finality Strategy therefore connects the conduct of war with the intent of politics It shapes and guides military means in anticipation of a panoply of possible coming events In the process strategy changes the context within which events will happen In this new book we see clearly that the goal of strategy is not to culminate events to establish finality in the discourse between states but to continue them to influence state discourse in such a way that it will go forward on favorable terms For continue it will This book will provoke debate and stimulate new thinking across the field and strategic studies
