**Summary of Sheena Iyengar's The Art of Choosing** Everest Media, 2022-04-29T22:59:00Z Please note This is a companion version not the original book Sample Book Insights 1 We often ask these questions not because we re looking for survival tips but because we re fascinated by our limits and our ability to cope with the kinds of extreme conditions that there is little preparation for 2 The author explains that choice is an extremely powerful force that determines how we live We can measure our lives by the choices we make which brings us to where we are today 3 In 1957 Curt Richter conducted an experiment that showed how some rats were more persistent than others The rats were placed in a situation where they had to swim for their lives and even though the water temperature was the same some rats continued swimming for an average of 60 hours before becoming exhausted 4 When we speak of choice what we mean is the ability to exercise control over ourselves and our environment To choose we must first perceive that control is possible The rats kept swimming despite mounting fatigue and no apparent means of escape because they had already tasted freedom which they had attained through their own vigorous wriggling efforts

Nishkam S. Agarwal,2015-06-11 Meaning and Purpose of Life are perhaps the most thought about if not talked about issues on the planet since human beings have walked on earth This book is another attempt to understand the Meaning and Purpose of Life using the ideas of Vedanta in Indian philosophy and of mainstream economics Starting from first principles Dr Agarwal explores the core concept of Brahman in Vedanta and builds an axiomatic foundation for understanding the meaning and purpose of life using the fundamental ideas of the Prasthanas Traya and in particular of The Bhagavad Gita and The Principal Upanishads Dr Agarwal adheres to the philosophy of Karma Yoga as his chosen area of interest for the exploration of meaning and purpose which allows him to seek linkages between the concepts of social welfare in Vedanta and economics Ideas of lokasamgraha in Indian philosophy and of externalities in economics provide a clear common ground between the two apparently disparate disciplines Throughout the book he emphasizes simple practical approaches for making life more meaningful and happier while relying fundamentally on the basic ideas of Vedanta The Hero's Life Choice. choice in international legal and political decision making that investigates the neurobiology of choice and the history of how it has affected international peace and security **Children, Autonomy and the Courts** Aoife Daly,2017-12-18 In this book Aoife Daly argues that where courts decide children s best interests for example about parental contact the UN Convention

on the Rights of the Child's right to be heard is insufficient and autonomy should instead be the focus. Global law and practice indicate that children are regularly denied due process rights in their own best interest proceedings and find their wishes easily overridden. It is argued that a children's autonomy principle respecting children's wishes unless significant harm would likely result would ensure greater support for children in proceedings and greater obligations on adults to engage in transparent decision making. This book is a call for a reconceptualisation of the status of children in a key area of children's rights. Rational Constructivism in Cognitive Development, 2012-12-31. **The Science of**

**Intelligent Achievement** Isaiah Hankel, 2018-02-05. Smart strategies for pragmatic science based growth and sustainable achievement. *The Science of Intelligent Achievement* teaches you the scientific process of finding success through your most valuable assets. Selective focus: how selective are you with who and what you let into your life? Creative ownership: how dependent are you on others for your happiness and success? Pragmatic growth: how consistently and practically are you growing daily? First, this book will show you how to develop your focus by being very selective with where you spend your mental energy. If you've failed to reach an important goal because you were distracted, misinformed or overcommitted, then you know the role focus and selectivity play in achievement. Second, you will learn how to stop allowing your happiness and success to be dependent on other people and instead start taking ownership over your life through creative work. Finally, you will learn the art of changing your life through pragmatic decisions and actions. Self improvement is not the result of dramatic changes. Instead, science has shown that personal and professional change is initiated and sustained by consistent

practical changes To grow you must leverage the power of micro decisions personality responsibility and mini habits Your own biology will not let you improve your life in any other way What do you currently value What are working to attain Have you been taught to value your job title or your relationship with some other person above all else Have you been convinced that the most valuable things in life are your paycheck the number of people who say hello to you at the office and the number of people who say I need you at home Or have you become so passive in what you value that you let anyone and anything into your life as long as whatever you let in allows you to stay disconnected from the cold hard truth that when things really go wrong in your life the only person who will be able to fix it and the only person will be responsible for it is you If so welcome to fake success Passivity dependence and the sacrifice of practical thinking and personal responsibility to fuzzy grandiose ideals and temporary feelings these are markers of fake success Intelligent Achievement on the other hand is not a moving target It s not empty either Instead it s sturdy full and immovable It s not something that s just handed to you It s not something you re nudged to chase or coerced into wanting Intelligent Achievement comes from within you It s a collection of values that are aligned with who you are values you have to protect and nurture These values do not increase your dependence on other people and things Instead they relieve you of dependence This kind of achievement is something that you have a part in building from the ground up you know what s in it you chose it someone else didn t choose it for you Achieving real success means you must focus create and grow daily The Science of Intelligent Achievement will show you how
