The Smart Wife Yolande Strengers, Jenny Kennedy, 2021-08-31 The life and times of the Smart Wife feminized digital assistants who are friendly and sometimes flirty occasionally glitchy but perpetually available Meet the Smart Wife at your service an eclectic collection of feminized AI robotic and smart devices This digital assistant is friendly and sometimes flirty docile and efficient occasionally glitchy but perpetually available She might go by Siri or Alexa or inhabit Google Home She can keep us company order groceries vacuum the floor turn out the lights A Japanese digital voice assistant a virtual anime hologram named Hikari Azuma sends her master helpful messages during the day an American sexbot named Roxxy takes on other kinds of household chores In *The Smart Wife* Yolande Strengers and Jenny Kennedy examine the emergence of digital devices that carry out wifework domestic responsibilities that have traditionally fallen to human wives They show that the principal prototype for these virtual helpers designed in male dominated industries is the 1950s housewife white middle class heteronormative and nurturing with a spick and span home It's time they say to give the Smart Wife a reboot What's wrong with preferring domestic assistants with feminine personalities We like our assistants to conform to gender stereotypes so what For one thing Strengers and Kennedy remind us the design of gendered devices reinscribes those outdated and unfounded stereotypes Advanced technology is taking us backwards on gender equity Strengers and Kennedy offer a Smart Wife manifesta proposing a rebooted Smart Wife that would promote a revaluing of femininity in society in all her glorious diversity

Questioning Technology with Jacques Ellul David W. Gill, Lisa Richmond, 2025-10-07 Twenty first century technology is an ever expanding powerful force in virtually every aspect of human life and every corner of the globe So much of modern technology has resulted in positive improvements in communication work health and other domains Technology's promises and possibilities for the future are often glowing But it is one thing for technology to function as a tool serving human purpose and flourishing and quite another for it to be granted the position of unquestioned master All technologies deserve to be questioned What are their costs trade offs and potential or real negative impact And how do we create limits and controls for technological invasion when these would be wise and necessary *Questioning Technology* with Jacques Ellul addresses these questions in both the big picture and in their relevance to specific arenas such as art politics work and religion with voices from not just the academy but also the workplace and society

Threshold Heather Suzanne Woods, 2024-05-15 Smart homes are domestic spaces outfitted with networked technology made by brands like Google Facebook Amazon and Apple However Silicon Valley purveyors are not the only important actors

in smart home development Appliance makers logistics companies health and wellness conglomerates insurance companies and security franchises are all betting on the smart home in an economy that puts a premium on data Together major players in the smart home space have successfully attracted the attention and pocketbooks of millions of households by touting the virtues of ambient networked technologies as an upgrade to modern domestic life If industry predictions hold nearly half of American houses will be smart by 2024 Yet what it means to be smart is still unsettled Threshold asks and answers the question How do smart homes communicate cultural values about the role of technology in the 21st century Answering this question is time sensitive as the coming years will determine how smart homes are configured who has access to them and what they mean to their owners policy makers technology companies and others invested in these domestic digital platforms The consequences of these decisions are significant because they impact both smart home residents and society at large At present much of the research on smart homes caters either to industry experts or scientists and engineers This literature often describes or evaluates the technical capacities of the smart home or focuses on user interface and design Instead Heather Woods argues we need a sustained cultural analysis of smart homes that considers the socio technical variables gender class income disparity race criminal justice the housing market and the future of both labor and domesticity that give the smart home meaning Threshold takes up this challenge from a rhetorical perspective arguing that smart homes are lived material embodiments of the digital cultures in which they are imagined built and used Those considerations more often than not are relegated to secondary considerations when in truth they are the most pervasive and consequential factors affecting anyone participating in a smart home ecosystem Woods argues that smart homes are spatial manifestations of a phenomenon called living in digitality a cultural condition whereby users engage with technology at every moment of every day Using extensive fieldwork at smart homes throughout the USA Woods traces how smart homes urge ubiquitous computing as a normalized daily practice readying domestic spaces and their occupants for an increasingly transactional digital future that is largely controlled by corporate interests Threshold advances knowledge in three ways by 1 Offering definitional tools for identifying and evaluating immersive technologies including but not limited to the smart home 2 Identifying three distinct configurations of the smart home according to their domestic and technological functions 3 Demonstrating the productive capacity of smart homes and smart devices to influence social life The book highlights the rhetorical force of smart domesticity for rhetorical scholars digital humanists political scientists critical theorists policy makers and residents or prospective residents of smart homes Ultimately Threshold serves as a toolkit for recognizing and responding to the persistent encroachment of digital technologies in all parts of our lives

Smart Things Mike Kuniavsky, 2010-09-14 The world of smart shoes appliances and phones is already here but the practice of user experience UX design for ubiquitous computing is still relatively new Design companies like IDEO and frogdesign are regularly asked to design products that unify software interaction device design and service design which are all the key components of ubiquitous computing UX

and practicing designers need a way to tackle practical challenges of design Theory is not enough for them luckily the industry is now mature enough to have tried and tested best practices and case studies from the field Smart Things presents a problem solving approach to addressing designers needs and concentrates on process rather than technological detail to keep from being quickly outdated It pays close attention to the capabilities and limitations of the medium in question and discusses the tradeoffs and challenges of design in a commercial environment Divided into two sections frameworks and techniques the book discusses broad design methods and case studies that reflect key aspects of these approaches The book then presents a set of techniques highly valuable to a practicing designer It is intentionally not a comprehensive tutorial of user centered design as that is covered in many other books but it is a handful of techniques useful when designing ubiquitous computing user experiences In short Smart Things gives its readers both the why of this kind of design and the how in well defined chunks Tackles design of products in the post Web world where computers no longer have to be monolithic expensive general purpose devices Features broad frameworks and processes practical advice to help approach specifics and techniques for the unique design challenges Presents case studies that describe in detail how others have solved problems managed trade offs and met successes **Meet Me at the Fair: A World's Fair Reader** Celia

Pearce,Bobby Schweizer,Laura Hollengreen,Rebecca Rouse,2014 Together with the Olympics world s fairs are one of the few regular international events of sufficient scale to showcase a spectrum of sights wonders learning opportunities technological advances and new or renewed urban districts and to present them all to a mass audience Meet Me at the Fair A World s Fair Reader breaks new ground in scholarship on world s fairs by incorporating a number of short new texts that investigate world s fairs in their multiple aspects political urban architectural anthropological sociological technological commercial popular and representational Contributors come from eight different countries and represent affiliations in academia museums and libraries professional and architectural firms non profit organizations and government regulatory agencies In taking the measure of both the material artifacts and the larger cultural production of world s fairs the volume presents its own phantasmagoria of disciplinary perspectives historical periods geographical locales media and messages mirroring the microcosmic form of the world s fair itself **Borderline** Stan Goff,2015-02-11 What if the sanctification of war and

contempt for women are both grounded in a fear that breeds hostility and a hostility that rationalizes conquest The anti Gospel Christian history of war loving and women hating are not merely similar but two aspects of the same dynamic argues Stan Goff in an autobiography that spans millennia Borderline is the historical and conceptual autobiography of a former career army veteran transformed by Jesus into a passionate advocate for nonviolence written by a man who narrates his conversion to Christianity through feminism Relocating Television Jostein Gripsrud,2012-07-26 For over half a century television has been the most central medium in Western democracies the political social and cultural centrepiece of the public sphere Television has therefore rarely been studied in isolation from its socio cultural and political context there is

always something important at stake when the forms and functions of television are on the agenda The digitisation of television concerns the production contents distribution and reception of the medium but also its position in the overall largely digitised media system and public sphere where the internet plays a decisive role The articles in this comprehensive collection are written by some of the world's most prominent scholars in the field of media communication and cultural studies including critical film and television studies Relocating Television offers readers an insight into studying television alongside the internet participatory media and other technocultural phenomena such as DVDs user generated content and everyday digital media production It also focuses on more specific programmes and phenomena including The Wire MSN amateur footage in TV news Bollywoodization of TV news YouTube fan sites tied to e g Grey's Anatomy and X Factor Relocating Television will be highly beneficial to both students and academics across a wide range of undergraduate and postgraduate courses including media communication and cultural studies and television and film studies

Power Button Rachel Plotnick, 2024-04-30 Push a button and turn on the television tap a button and get a ride click a button and like something The touch of a finger can set an appliance a car or a system in motion even if the user doesn't understand the underlying mechanisms or algorithms How did buttons become so ubiquitous Why do people love them loathe them and fear them In Power Button Rachel Plotnick traces the origins of today's push button society by examining how buttons have been made distributed used rejected and refashioned throughout history Focusing on the period between 1880 and 1925 when technologies of the hand proliferated including typewriters telegraphs and fingerprinting Plotnick describes the ways that button pushing became a means for digital command which promised effortless discreet and fool proof control Emphasizing the doubly digital nature of button pushing as an act of the finger and a binary activity on off up down Plotnick suggests that the tenets of precomputational digital command anticipate contemporary ideas of computer users Plotnick discusses the uses of early push buttons to call servants and the growing tensions between those who work with their hands and those who command with their fingers automation as automagic enabling command at a distance instant gratification and the victory of light over darkness and early twentieth century imaginings of a future push button culture Push buttons Plotnick tells us have demonstrated remarkable staying power despite efforts to cast button pushers as lazy privileged and even dangerous

Atomic Dwelling Robin Schuldenfrei, 2012-08-21 In the years of reconstruction and economic boom that followed the Second World War the domestic sphere encountered new expectations regarding social behaviour modes of living and forms of dwelling This book brings together an international group of scholars from architecture design urban planning and interior design to reappraise mid twentieth century modern life offering a timely reassessment of culture and the economic and political effects on civilian life This collection contains essays that examine the material of art objects and spaces in the context of practices of dwelling over the long span of the postwar period It asks what role material objects interior spaces and architecture played in quelling or fanning the anxieties of modernism's ordinary denizens and how this role informs their

License to Spill Rachel Plotnick, 2025-04-29 How everyday wetness from finger smudges sweat and spilled drinks to showering and swimming collides with consumers media devices designed to stay dry License to Spill investigates the everyday moments activities and spaces where media technologies and liquids collide from disastrous spilled drinks that corrode laptops and drops in the toilet that drown smartphones to the greasy finger smudges and sweat droplets that sully screens and glitch smartwatches Putting historical and present day case studies in conversation Rachel Plotnick considers how people's experiences with media devices inevitably encounter wetness and yet consumers not the companies who make the devices take the blame when leaks spillages and overflows occur Along with thinking about preventive measures and device caretaking License to Spill examines how water resistant and waterproofed technologies through their design and marketing imagine the brawniest and hardest of users meant to punish and abuse their tough devices granting them unfettered permission to get wet Examining a long history of torture testing and hyperbolic claims of imperviousness the book demonstrates how protective designs relate to broader cultural ideas about media use as sporty luxurious excessive or messy This context is especially relevant given that the market for water resistant bags cases coatings and seals has flourished over the past decade with new rhetoric about wetness as natural and digital technologies as ever present The book pushes us to attend to both the ideals and problems that arise when designing resilient devices ranging from the right to repair movement and lawsuits over ingress protection IP ratings to obsolescence culture and work from home activities in the wake of the COVID 19 pandemic

Disneyfying Ile De France? Anne-Marie d'Hauteserre, 2020-11-17 The book captures the history as well as the meaning and the value of the on going partnership between the French state and the Walt Disney Company remembering that it involved from the start more than a tourism project It examines how the combined aspirations of the French state and the American Company transformed Val d Europe as the sole potential location in Europe for the Company s theme parks while allowing the state to retain its egalitarian ideals Most critics believed the French state had caved into every demand of the Company No one ever mentioned profits of the state that it would then invest to support other projects The first part of the book investigates the encounter between the partners and the reasons why a welfarist state encouraged penetration by a capitalist enterprise alongside the Company s reasoning The second section reveals the continued cooperation between the two entities in the management of the urbanization of Val d Europe from the opening of the first Park and the start of a new major tourism development in spite of criticisms and fluctuating attendance in the parks The third part highlights more recent actions of the partners to create a formidable urban tourism pole that will attract ever more visitors while still critically examining their effectiveness and sustainability
