A Textbook Of Neurology:

Textbook of Neurology Kumar Navneet, 2011-02 Neurology a subject considered to be complex studies the nervous system and the disorders and diseases associated with it Most medical students find it a tough subject Though quite a few books are available in the market on the subject somehow they fail to explain the topics in an accessible style to the students What this comprehensive and reader friendly book strives to do is to demystify the subject and make it comprehensible even to the average reader The book encompasses within the covers of a single volume all aspects of neurology with great skill and dexterity It gives an in depth treatment of such topics as disorders of consciousness language and speech disorders sleep disorders movement disorders vertigo and ataxia Dr Navneet Kumar with his expertise and long years of experience gives a masterly analysis of many other topics such as headaches including migraine backaches meningitis and strokes in both the young and the elderly He devotes four chapters exclusively to Epilepsy a disease dreaded by many with lots of superstitions attached to it What's more he discusses in detail about a host of other topics in neurology for example the early diagnosis of dementia Alzheimer's disease and neurological and psychiatric disorders This book is intended primarily as a text for students of MD and DNB Medicine as well as for students of Paediatrics Besides students of MBBS DM Neurology and M Ch Neurosurgery as also practising physicians who wish to have a deeper knowledge of the subject will find the book quite useful

KEY FEATURES Describes modern investigative techniques in the diagnosis of nervous system disorders these include EEG CAT scan MRI PET scan and EMG Provides photographs and a large number of diagrams and tables to illustrate the concepts discussed Acquaints the readers with the latest methods of neurological therapy such as gene therapy and stem cell therapy

Neurology Charles Clarke, Robin Howard, Martin Rossor, Simon Shorvon, 2011-09-09 Neurology A Queen Square Textbook is a remarkable fusion of modern neuroscience with traditional neurology that will inform and intrigue trainee and experienced neurologists alike Modern neuroscience has penetrated exciting and diverse frontiers into the causes diagnosis and treatment of neurological disease Clinical neurology whilst greatly enhanced by dramatic advances in molecular biology genetics neurochemistry and physiology remains deeply rooted in practical traditions the history from the patient and the elicitation of physical signs Neurologists neuroscientists and neurosurgeons working at Queen Square and advised by an international editorial team have combined their expertise and experience to produce this unique text The synthesis of clinical neurology with translational research provides a fresh perspective which is Practical Multidisciplinary Translational Integrative The blend of new science and proven practice underpins this creative approach towards investigating and improving the care of patients suffering from neurological diseases About Queen Square The world renowned National Hospital for Neurology Neurosurgery and UCL Institute of Neurology based in Queen Square London have an international reputation for training research and patient care Research at both institutions leads developments in translational medicine that are transforming the treatment of neurological disease
