This book argues that media and capitalism no longer exist as separated entities and posits three reasons why one can no longer exist without the other Firstly mass media have become indispensable to capitalism due to the media's ability to sell the commodities of mass consumerism Media capitalism also creates pro capital attitudes among a target population and establishes an ideological hegemony Thirdly media capitalism provides mass deception to hide the pathologies of capitalism which include mass poverty rising inequalities and the acceleration of global warming To illuminate this the book's historical chapter traces the emergence of media capitalism Its subsequent chapters show how media capitalism has infiltrated the public sphere society schools universities the world of work and finally democracy The book concludes by outlining how societies can transition from media capitalism to a post media capitalist society      **Between Scientists & Citizens** Jean

Goodwin,2012 This volume brings together selected papers from an interdisciplinary conference focused on effective and appropriate communication of science in the often heated controversies characteristic of contemporary democracies The forty essays represent cutting edge work from rhetorical and communication theorists studying the practices and norms of public discourse and science communication philosophers interested in the informal logic of everyday reasoning and in the theory of deliberative democracy and science studies scholars examining the intersections between the social worlds of scientists and citizens Topics include the theory and practice of public participation exercises involving experts and lay publics communication techniques for conveying uncertainty complexity and scale pseudocontroversy and manufactured doubt about science and the maintenance of trust between scientists and citizens      Embracing the Wide Sky Daniel Tammet,2009-12-29 A tour of brain science explores the disparity between the brain's seemingly endless capacity and its tendency to fail at even simple tasks in an account by a famous autistic savant that incorporates elements of his own story
