The Alchemist in Literature Theodore Ziolkowski, 2015 Unlike most other studies of alchemy and literature which focus on alchemical imagery in poetry of specific periods or writers this book traces the figure of the alchemist in Western literature from its first appearance in the Eighth Circle of Dante's *Inferno* down to the present From the beginning alchemy has had two aspects exoteric or operative the transmutation of baser metals into gold and esoteric or speculative the spiritual transformation of the alchemist himself From Dante to Ben Jonson during the centuries when the belief in exoteric alchemy was still strong and exploited by many charlatans to deceive the gullible writers in major works of many literatures treated alchemists with ridicule in an effort to expose their tricks From the Renaissance to the Enlightenment as that belief weakened the figure of the alchemist disappeared even though Protestant poets in England and Germany were still fond of alchemical images But when eighteenth century science almost wholly undermined alchemy the figure of the alchemist began to emerge again in literature now as a humanitarian hero or as a spirit striving for sublimation Following these esoteric romanticizations as scholarly interest in alchemy intensified writers were attracted to the figure of the alchemist and his quest for power The fin de siècle saw a further transformation as poets saw in the alchemist a symbol for the poet per se and others influenced by the prevailing spiritism as a manifestation of the religious spirit During the interwar years as writers sought surrogates for the widespread loss of religious faith esoteric alchemy underwent a pronounced revival and many writers turned to the figure of the alchemist as a spiritual model or in the case of Paracelsus in Germany as a national figurehead This tendency theorized by C G Jung in several major studies inspired after World War II a vast popularization of the figure in novels historical set in the present or juxtaposing past and present in England France Germany Italy Brazil and the United States The inevitable result of this popularization was the trivialization of the figure in advertisements for healing and cooking or in articles about scientists and economists In sum the figure of the alchemist in literature provides a seismograph for major shifts in intellectual and cultural history

Understanding Sponsored Search Jim Jansen, 2011-07-25 This book addresses the underlying foundational elements both theoretical and methodological of sponsored search. As such, the contents are less affected by the ever-changing implementation aspects of technology. Rather than focusing on the how, this book examines what causes the how. Why do certain keywords work while others do not? Why does that ad work well when others that are similar do not? Why does a key phrase cost a given amount? Why do we measure what we do in keyword advertising? This book speaks to that curiosity to understand why we do what we do in sponsored search. The content flows through the major components of any sponsored search effort regardless of the underlying technology or client or product. The book addresses keywords, ads, consumers, pricing, competitors, analytics, branding, marketing, and advertising, integrating these separate components into an incorporated whole. The focus is on the critical elements with ample illustrations and with enough detail to lead the interested reader to further inquiry.
