Finn,2013-08-01 What does the history of Christian views of economic life mean for economic life in the twenty first century Here Daniel Finn reviews the insights provided by a large number of texts from the Bible and the early church to the Middle Ages and the Protestant Reformation to treatments of the subject in the last century Relying on both social science and theology Finn then turns to the implications of this history for economic life today Throughout the book invites the reader to engage the sources and to develop an answer to the volume s basic question Religion and Politics in America Frank J.

Smith,2016-07-11 There has always been an intricate relationship between religion and politics This encyclopedia provides a comprehensive overview of the interrelation of religion and politics from colonial days to the present Can a judge display the Ten Commandments outside of the courthouse Can a town set up a nativity scene on the village green during Christmas Should U S currency bear the In God We Trust motto Should public school students be allowed to form bible study groups Controversies about the separation of church and state the proper use of religious imagery in public space and the role of religious beliefs in public education are constantly debated This work offers insights into contemporary controversies regarding the uneasy intersections of religion and politics in America Organized alphabetically the entries place each topic in its proper historical context to help readers fully grasp how religious beliefs have always existed side by side and often clashed with political ideals in the United States from the time of the colonies The information is presented in an unbiased manner that favors no particular religious background or political inclination This work shows that politics and religion have always had an impact on one another and have done so in many ways that will likely surprise modern students **Just**

Universities Gerald J. Beyer,2021-02-23 Gerald J Beyer s Just Universities discusses ways that U S Catholic institutions of higher education have embodied or failed to embody Catholic social teaching in their campus policies and practices Beyer argues that the corporatization of the university has infected U S higher education with hyper individualistic models and practices that hinder the ability of Catholic institutions to create an environment imbued with bedrock values and principles of Catholic Social Teaching such as respect for human rights solidarity and justice Beyer problematizes corporatized higher education and shows how it has adversely affected efforts at Catholic schools to promote worker justice on campus equitable admissions financial aid retention policies diversity and inclusion policies that treat people of color women and LGBTQ persons as full community members just investment and stewardship of resources and the environment Doing Probation

Work Rob Mawby,Anne Worrall,2013-03-05 A great deal has been written about the political policy and practice changes that

have shaped probation work but little has been written on the changes to occupational cultures and the ways in which probation workers themselves view their role. This book fills that gap by exploring the meaning of doing probation work from the perspective of probation workers themselves. Based on 60 extensive interviews with probation workers who joined the probation service from the 1960s to the present day, this book reaches beyond criminological and policy analysis to an application of sociological and organizational theory to rich qualitative data. It explores the backgrounds and motivations of probation workers, their changing relationships with other criminal justice agencies, and the complex public perceptions and media representations of probation work. The book considers the relative influences of religion, the union, diversity, and feminization, and while it acknowledges that probation work is stressful, it draws innovatively on sociological and organizational concepts to categorize how workers respond to turbulent times. This book challenges the dominant narrative of probation's decline in recent literature and constructs three ideal types of probation worker: lifers, second careerists, and offender managers. Each makes an essential contribution to probation cultures which collectively contribute to rather than undermine the effectiveness of offender management and the future of probation work. This book will be important reading for researchers in the disciplines of criminology, criminal justice, sociology, and management, as well as probation workers of all grades and those in training.

Spiritual Diversity in Social Work Practice Edward R. Canda, Leola Dyrud Furman, 2010. Weaving together interdisciplinary theory and research, as well as the results from a national survey of practitioners, the authors describe a spiritually oriented model for practice that places clients' challenges and goals within the context of their deepest meanings and highest aspirations. Using richly detailed case examples and thought-provoking activities, this highly accessible text illustrates the professional values and ethical principles that guide spiritually sensitive practice. It presents definitions and conceptual models of spirituality and religion, draws connections between spiritual diversity and cultural, gender, and sexual orientation diversity, and offers insights from Buddhism, Christianity, Confucianism, Hinduism, Indigenous religions, Islam, Judaism, Existentialism, and Transpersonal theory. Eminently practical, it guides professionals in understanding and assessing spiritual development and related mental health issues and outlines techniques that support transformation and resilience, such as meditation, mindfulness, ritual, forgiveness, and engagement of individual and community-based spiritual support systems.

Spirituality Matters in Social Work James Dudley, 2016-03-02. Offering a focus that is lacking or not clearly evident in most spirituality books, Dudley addresses specific ways of incorporating spirituality into practice and integrates many of the contributions of other writers into an overall eclectic practice approach. His approach revolves around many of the core competencies of the EPAS accreditation (CSWE, 2008). Most of the core competencies are addressed with an emphasis on professional identity, ethical practice, critical thinking, diversity, practice contexts, and a major practice framework of the book: the practice stages of engagement, assessment,
