Syntax - Theory and Analysis. Volume 3 Tibor Kiss, Artemis Alexiadou, 2015-03-10 This Handbook represents the development of research and the current level of knowledge in the fields of syntactic theory and syntax analysis Syntax can look back to a long tradition Especially in the last 50 years however the interaction between syntactic theory and syntactic analysis has led to a rapid increase in analyses and theoretical suggestions This second edition of the Handbook on Syntax adopts a unifying perspective and therefore does not place the division of syntactic theory into several schools to the fore but the increase in knowledge resulting from the fruitful argumentations between syntactic analysis and syntactic theory It uses selected phenomena of individual languages and their cross linguistic realizations to explain what syntactic analyses can do

and at the same time to show in what respects syntactic theories differ from each other It investigates how syntax is related to neighbouring disciplines and investigate the role of the interfaces especially the relationship between syntax and phonology morphology compositional semantics pragmatics and the lexicon The phenomena chosen bring together renowned experts in syntax and represent the consensus reached as to what has to be considered as an important as well as illustrative syntactic phenomenon The phenomena discussed do not only serve to show syntactic analyses but also to compare theoretical approaches with each other

**A Computational Model of Natural Language Communication** Roland R. Hausser, 2006-09-28 Everyday life would be easier if we could simply talk with machines instead of having to program them Before such talking robots can be built however there must be a theory of how communicating with natural language works This requires not only a grammatical analysis of the language signs but also a model of the cognitive agent with interfaces for recognition and action an internal database and an algorithm for reading content in and out In Database Semantics these ingredients are used for reconstructing natural language communication as a mechanism for transferring content from the database of the speaker to the database of the hearer Part I of this book presents a high level description of an artificial agent which humans can freely communicate with in their accustomed language Part II analyzes the major constructions of

natural language i.e. intra and extrapositional functor argument structure coordination and coreference in the speaker and the hearer mode Part III defines declarative specifications for fragments of English which are used for an implementation in Java The book provides researchers graduate students and software engineers with a functional framework for the theoretical analysis of natural language communication and for all practical applications of natural language processing

**Explain Me This** Adele E. Goldberg, 2019-02-12 Why our use of language is highly creative yet also constrained We use words and phrases creatively to express ourselves in ever changing contexts readily extending language constructions in new ways Yet native speakers also implicitly know when a creative and easily interpretable formulation such as Explain me this or She considered to go doesn't sound quite right In this incisive book Adele Goldberg explores how these creative but constrained language skills emerge from a combination of general cognitive mechanisms and experience Shedding critical light on an enduring linguistic paradox Goldberg demonstrates how words and abstract constructions are generalized and constrained in the same ways When learning language we record partially abstracted tokens of language within the high dimensional conceptual space that is used when we speak or listen Our implicit knowledge of language includes dimensions related to form function and social context At the same time abstract memory traces of linguistic usage events cluster together on a subset of dimensions with overlapping aspects strengthened via repetition In this way dynamic categories that correspond to words and abstract constructions emerge from partially overlapping memory traces and as a result distinct words and constructions compete with one another each time we select them to express our intended messages While much of the research on this puzzle has favored semantic or functional explanations over statistical ones Goldberg's approach stresses that both the functional and statistical aspects of constructions emerge from the same learning mechanisms

Function and Class in Linguistic Description Mário Alberto Perini, 2021-09-22 This book deals with the traditional problem of the classification of linguistic units with a primary focus on word classes The approach is descriptive rather than theoretical and is based on the use of distinctive features analogous to the ones used in phonology which entails a radical

reworking of the traditional classification The first part presents some basic notions such as the use of distinctive features and the role of word classes in grammar classification by prototypes and the use of world knowledge as a resource to assign thematic relations to constituents in the sentence In the second part some descriptive problems are examined namely the classification of verbs according to valency connectives adverbs and the internal constituents of the NP and the classification of units larger than words This book will be of use as a guide for linguists working on the description of natural languages as well as a resource for students on courses in linguistic theory and description **The Oxford History of English**

**L'annee 1999** Mark Janse, Hella Olbertz, Sijmen Tol, 2003-11-30 Setting out the historical national and religious characteristics of the Italians as they impact on the integration within the European Union this study makes note of the two characteristics that have an adverse effect on Italian national identity cleavages between north and south and the dominant role of family It discusses how for Italians family loyalty is stronger than any other allegiance including feelings towards their country their nation or the EU Due to such subnational allegiances and values this book notes that Italian civic society is weaker and engagement at the grass roots is less robust than one finds in other democracies leaving politics in Italy largely in the hands of political parties The work concludes by noting that EU membership however provides no magic bullet for Italy it cannot change internal cleavages the Italian worldview and family values or the country's mafia dominated power matrix and as a result the underlying absence of fidelity to a shared polity Italian or European leave the country as ungovernable as

ever **The Phraseological View of Language** Thomas Herbst, Susen Faulhaber, Peter Uhrig, 2011-11-30 This volume presents the results of the international symposium Chunks in Corpus Linguistics and Cognitive Linguistics held at the University of Erlangen Nuremberg to honour John Sinclair's contribution to the development of linguistics in the second half of the twentieth century The main theme of the book highlighting important aspects of Sinclair's work is the idiomatic character of language with a focus on chunks in the sense of prefabricated items as extended units of meaning To pay tribute to Sinclair's enormous impact on research in this field the volume contains two contributions which deal explicitly with his work including material from unpublished manuscripts Beyond that the articles cover different aspects of chunks ranging from more theoretically oriented to more applied papers in which foreign language teaching and the computational application of the insights about the nature of language provided by corpus research play an important role The volume demonstrates the wide applicability and relevance of the notion of chunks by bringing together research from different fields of linguistics such as theoretical linguistics psycholinguistics computational linguistics and foreign language teaching and thus provides an interdisciplinary view on the impact of idiomaticity in language Text, Speech, and Dialogue Kamil Ekštejn, Miloslav Konopík, Ondřej Pražák, František Pártl, 2025-08-21 This conference volume constitutes the proceedings of the 28th International Conference on Engineering on Text Speech and Dialogue TSD 2025 held in Erlangen Germany in August 2025 The 60 full papers were presented in this volume were carefully reviewed and selected from 122 submissions They focus on speech and language technologies and computer processing of speech and language related data **The Cambridge History of Linguistics** Linda R.
