African Successes Modernization Development Conference:

African Successes, Volume III Sebastian Edwards, Simon Johnson, David N. Weil, 2016-09-23 Studies of African economic development frequently focus on the daunting challenges the continent faces From recurrent crises to ethnic conflicts and long standing corruption a raft of deep rooted problems has led many to regard the continent as facing many hurdles to raise living standards Yet Africa has made considerable progress in the past decade with a GDP growth rate exceeding five percent in some regions The African Successes series looks at recent improvements in living standards and other measures of development in many African countries with an eye toward identifying what shaped them and the extent to which lessons learned are transferable and can guide policy in other nations and at the international level The third volume in the series African Successes Modernization and Development looks at the rise in private production in spite of difficult institutional and physical environments The volume emphasizes the ways that technologies including mobile phones have made growth in some areas especially dynamic

Africa's digital future Ali Parry, Susara J. Jansen van Rensburg, 2021-12-31 The main thrust of this book is to examine whether Africa is in a position to benefit from the digital age given the continent's many development challenges and slow adoption of digital technologies While there is substantial literature on the digital economy and the quickening pace of the Fourth Industrial Revolution 4IR comparatively little research has been conducted on what the digital age means for Africa This book aims to close this research gap by using various qualitative and quantitative research methodologies to arrive at a cross section of original findings and perspectives on how Africa can capitalise on the benefits of digital developments including their potential to create jobs and bring about more inclusive growth The book's main contribution is its coverage of a range of topics that will affect Africa's digital future including industrialisation global value chains transport and logistics trade facilitation labour market dynamics employment and education The theme of digital trade forms a backdrop to many of the chapters along with references to the COVID 19 pandemic The book acknowledges that although African countries should learn from international best practices they need to chart their own course according to their own particular circumstances By adopting a digital mindset countries should be able to diversify economically and extend their market reach across the continent Furthermore while Africa should be looking to the future and determining how digital technologies can become effective tools of sustainable development the continent has much catching up to do
