Afrocentric Architecture A Design Primer:

Afrocentric Architecture David Hughes,1994 The Crisis of the African-American Architect Melvin L. Mitchell,2003
another missing piece of our rich history and profound contribution to western civilization For history buffs please put this book on your must read list George C Fraser Author of Race For Success and Success Runs In Our Race Mitchell believes that the entire future of blacks in the field of architecture is in jeopardy He then discusses the impact of the Harlem Renaissance on black architecture and the subsequent emergence of Howard University as the center of the black architectural universe The Journal of Blacks in Higher Education seminal Architecture Magazine In this long overdue book aimed at Black America and her allies Melvin Mitchell poses the question why haven t black architects developed a Black Architecture that complements modernist black culture that is rooted in world class blues jazz hip hop music and other black aesthetic forms His provocative thesis inspired by Harold Cruse s landmark book The Crisis of the Negro Intellectual exposes the roots of an eighty year old estrangement between black architects and Black America Along the way he provides interesting details about the politics of downtown development in the Marion Barry era of Washington DC Mitchell calls for a bold and inclusive New Black Urbanism He sees the radical reform and re missioning of the handful of accredited HBCU based architecture schools as a critical tool in refashioning a rapprochement between black architects and Black America

Pathways to Alternative Epistemologies in Africa Adeshina Afolayan,Olajumoke Yacob-Haliso,Samuel Ojo Oloruntoba,2021-01-04 This volume investigates alternative epistemological pathways by which knowledge production in Africa can proceed The contributors using different intellectual dynamics explore the existing epistemological dominance of the West from architecture to gender discourse from environmental management to democratic governance and offer distinct and unique arguments that challenge the denigration of the different and differing modes of knowing that the West considered barbaric and primitive This volume therefore constitutes a minimal gesture that further contributes to the ongoing discourse on alternative modes of knowing in Africa *Africa's Buildings* Itohan I. Osayimwese,2025-09-23 A groundbreaking history of Africa s looted architectural heritage and a bold proposal for the repatriation of the continent s stolen cultural artifacts Between the nineteenth century and today colonial officials collectors and anthropologists dismembered African buildings and dispersed their parts to museums in Europe and the United States Most of these artifacts were cataloged as ornamental art objects which erased their intended functions and the removal of these objects often had catastrophic consequences for the original structures Africa s Buildings traces the history of the collection and distribution of African architectural fragments documenting the brutality of the colonial regimes that looted Africa s buildings and addressing the ethical questions surrounding the display of these objects Itohan Osayimwese ranges across the whole of Africa from Egypt in the north to Zimbabwe in the south and spanning the western central and eastern regions of the continent She describes how collectors employed violent means to remove elements such as columns and door panels from

buildings and how these methods differentiated architectural collecting from conventional collecting She shows how Western collectors mischaracterized building components as ornament erasing their architectural character and concealing the evidence of their theft Osayimwese discusses how the very act of displacing building parts like floor tiles and woven screen walls has resulted in a loss of knowledge about their original function and argues that because of these removals scholars have yet to fully grasp the variety and character of African architecture Richly illustrated Africa's Buildings uncovers the vast scale of cultural displacement perpetrated by the West and proposes a new role for museums in this history one in which they champion the repatriation of Africa's architectural heritage and restitution for African communities Design Primer for Hot Climates Allan Konya, 2013-10-22 Design Primer for Hot Climates offers a discussion of architecture and planning for hot climates The hot tropical and sub tropical regions contain most of the world's population and it is here that the majority of new buildings will be built For this reason this book concentrates on these regions but serves only as a broad outline of the climatic environmental and technological conditions The book begins with a discussion of climatic elements climatic zones and comfort This is followed by separate chapters on climatic design regional hazards e.g condensation lightning storms earthquakes etc that must be considered during the design stage and factors such as site accessibility materials selection water and labor supply and building regulations and standards This book is meant not only for designers from temperate climatic areas but also for those who live in these regions in the hope that they will be stimulated to re-examine conditions which may have become over familiar to them **Uwenzi** David O. Akombo, Baruti I. Katembo, Kmt G. Shockley, 2015-12-30 UWENZI The Pan African Factor A 21st Century View seeks to facilitate a much needed and provocative 21st century dialogue on optimizing the global linkage networking and appreciation of African peoples resources culture and or interests i.e Pan Africanism As a focus point the book posits and explains the need and rationale for Africa and its Diaspora to become reciprocal resources for each other **Re-engaging the African Diasporas** Charles Quist-Adade, Wendy Royal, 2016-08-17 Re-engaging the African Diasporas Pan Africanism in the Age of Globalization is the second volume in the Kwame Nkrumah International Conference series and brings together twenty selected papers presented at the Third Kwame Nkrumah International Conference held at Kwantlen Polytechnic University on August 19-21 2014 Two premises inform this volume 1 If the history of slavery and its vestiges divided and continue to divide the continent and its Diasporas modern technology should be harnessed to bridge that divide and 2 the continent's development is a boon to the development of what the African Union has dubbed Africa's Sixth Region The book threads together papers that seek to give academic and intellectual impetus to tie the continent's development to that of the African Diaspora The goal is to end the inertia and inward looking on the part of scholars and academics in both Africa and African International or Global Africa and re-engage one another in more productive ways By harnessing the enormous resources available in our internet age and riding the cresting wave of globalization the task of re-engagement will be vastly enhanced and the debates and discussions in this volume will serve to

facilitate this re engagement A main highlight of the conference was a special tribute to Nelson Mandela to honour his death in December 2013 and celebrate 20 years of South African independence In these papers scholars examine Mandela s role in the transition of South Africa from a racist state to a democratic nation They critically examine how the ANC s policies have impacted post Apartheid South Africa and question what alternatives remain for the future **Africana** Anthony Appiah, Henry Louis Gates (Jr.), 2005 Ninety years after W E B Du Bois first articulated the need for the equivalent of a black Encyclopedia Britannica Kwame Anthony Appiah and Henry Louis Gates Jr realized his vision by publishing Africana The Encyclopedia of the African and African American Experience in 1999 This new greatly expanded edition of the original work broadens the foundation provided by Africana Including more than one million new words Africana has been completely updated and revised New entries on African kingdoms have been added bibliographies now accompany most articles and the encyclopedia s coverage of the African diaspora in Latin America and the Caribbean has been expanded transforming the set into the most authoritative research and scholarly reference set on the African experience ever created More than 4 000 articles cover prominent individuals events trends places political movements art forms business and trade religion ethnic groups organizations and countries on both sides of the Atlantic African American history and culture in the present day United States receive a strong emphasis but African American history and culture throughout the rest of the Americas and their origins in African itself have an equally strong presence The articles that make up Africana cover subjects ranging from affirmative action to zydeco and span over four million years from the earliest known hominids to Sean Diddy Combs With entries ranging from the African ethnic groups to members of the Congressional Black Caucus Africana Second Edition conveys the history and scope of cultural expression of people of African descent with unprecedented depth *The International Review of African American Art*, 1996 Hip-Hop Architecture Sekou Cooke, 2021-04-22 A powerful examination of race identity hip hop and urban architecture Beyond Health Capacity Ulysses Sean Vance III, 2025-08-18 Beyond Health Capacity Spatial Practices in Inclusive Design sheds light on the systemic challenges communities with limited access to medical support and health maintenance have endured It emphasizes how approaching medical interventions through non traditional health facilities can positively impact health s social and environmental impact Health capacity is an emerging consideration for optimizing a building design to meet health criteria based on physical virtual historical or social space These emerging practices can be focused on by interrogating the role of planning construction and urban design in addressing public health needs alongside considering access and social justice as an agency in design This book reflects on past and present efforts interrogating the practical application of inclusive design practices in resolving the spatial challenges of health reform By focusing on examples experienced during the pandemic and after each chapter offers an overview documenting these experiences as approaches to these new competencies reimagining urbanism around health and proposing new criteria for the future of healthcare This book is essential for students and practitioners working in
