

COGNITIVE DISSONANCE THEORY

Cognitive dissonance is an internal conflict that occurs in a person when they hold two conflicting beliefs simultaneously.

DEFINITION

Cognitive dissonance theory states that our minds go through a process of confusion and logical conflict called cognitive dissonance when faced with new information that conflicts with existing information. We aim to resolve this to return to a state of cognitive equilibrium.

EXAMPLE

Smoking vs. Health: Smoking is generally known to be harmful to health, yet people continue to smoke despite this knowledge. It presents a cognitive dissonance for the smoker who must accept that their behavior contradicts their beliefs about health and well-being.
