A Beginners Guide To Doing Your Education Research Project:

A Beginner's Guide to Doing Your Education Research Project Mike Lambert, 2012-09-05 Mike Lambert's book is a useful source of information helping to create and shape your research methods project. The book contains detailed chapters with easy to follow guidelines, tips and suggestions ensuring help at every step of the way from start to finish. Alexander Miesen, student Amsterdam University of Applied Sciences. In this basic guide, step by step advice is presented in a clear way and chapters take the reader through the entire process from planning and doing research to writing it up. Each stage is covered with detailed help on choosing a topic, drawing up research questions, doing the literature review, choosing and designing research methods, the ethics of doing research, analyzing data and collating and presenting findings. Features in the text include explanations of key research terms, activities with answers, progress sheets, case studies. Online resources to accompany the book are available at www.methodspace.com/groups/mikelambert. This is an ideal text for undergraduate students undertaking their first ever research project, postgraduates pursuing Masters awards and teachers carrying out action research.

Researching Primary Education Rebecca Austin, 2016-05-16 How do we know what works in primary schools? How do we make sure that we are always learning from fellow teachers, always learning from the children we teach and always moving forward? The answer lies in research. In understanding, conducting, disseminating and learning from research. But what do we mean by research and how do we do it? This book is your guide to research in primary education. It takes you through both important established theory and recent developments in research and explores what these mean right now for primary education and classroom settings. It helps you to conceive, conduct, write up and share your research with others. It looks at how you can access research findings to improve your classroom practice and deepen your understanding. It examines how you can use research in your classroom everyday to continually enhance teaching and how you can shape and frame the questions you ask to help you get to the answers you need. If you are a trainee teacher doing a research project as part of your course or a qualified teacher doing further study, this text includes all the guidance you need. If you are a teacher wanting to find out what works best for your class in your school right now, this text will show you how to harness the power of small or large scale research to help you find the answer.

Your Education Research Project Companion Jim Mcgrath, Anthony Coles, 2013-11-04 Whatever level you are working at and assuming no prior research experience, *Your Education Research Project Companion* 2nd edition provides the support and guidance you need in order to write a first class research project or dissertation in education. Written in the form of a fictional case study, the book charts the progress of a student working on an education research project through tutorials with their academic tutor. The clear, innovative narrative style will bridge the gap between theory and research practice to ensure you acquire the simple and essential information needed. New for this edition and included throughout the book is MA level advice helping you to know what more is required of you to achieve a Masters qualification.

Educational Research: a Beginner's Guide Allyson

Sesay,2012-01-04 This book presents a rudimentary exposure to the field of educational research and an attempt to allay the unwarranted fear of those who perceive research as a highly technical and complex scholarly activity carried out by persons in the sciences The author takes the position that anyone can do research and that it can be an interesting and very worthwhile experience Educational research particularly action research which the author emphasizes is an invaluable exercise about which everyone in education should be knowledgeable or at least be familiar Starting with an explication of some salient concepts in the study of research e g research educational research research problem v research topic hypothesis experimental v non experimental research the book takes the reader through the process of conducting a research problem from problem selection and statement significance review of literature methodology data analysis findings to recommendations and conclusions Detailed descriptions of the American Psychological Association APA style of referencing with ample examples are provided The book is written in simple language so that even high school students will be able to acquire a fairly good understanding of each contents Though the primary target population is undergraduate students of education the contents are broad enough to provide a guide for students in other disciplines as well as whet the appetite of the general reader who seeks only a basic knowledge of research and or educational research Research Skills for Teachers 1e

Fitzgerald,Gundula Bosch,2023-11-28 Academic medical centers continue to require evidence of scholarly activity for their faculty to maintain their appointment and to advance in promotion rank For some training to know how to obtain evidence of scholarship was obtained through fellowship where information was passed from mentor to mentee in an apprenticeship fashion without a formalized text to follow to obtain the information In fellowship information might flow through word of mouth or articles handed down out to a mentee Others in fellowship develop skills by taking classes as part of an additional master s degree program such as a Master of Public Health For health professionals who enter an academic institution

without having gone through a fellowship program they are still expected to perform scholarly activity but don't have the benefit of having done the apprenticeship to learn the skills so unless they decide to find a course obtain a master's degree or find a fellowship they have no way to gain the necessary skills and are at risk of losing their appointment and have no hope of progressing in promotion This text provides a comprehensive toolbox for the academic who needs these skills to survive It serves as a valuable resource for health professionals physicians nurses pharmacists physical therapists and allied professionals as well as scientists and students with the steps necessary to take their educational endeavors from idea to implementation through dissemination Beginning with the concept of What is Scholarship the authors walk the reader through the concepts of how to find your niche look through the literature to check for a gap design a question consider evaluation and outcomes be aware of ethical considerations plan a project look for support find mentorship prepare an abstract present a poster disseminate a project and lead a team All chapters are written by experts in the subject matter
