Other Things Bill Brown, 2016-01-08 From the pencil to the puppet to the drone the humanities and the social sciences continue to ride a wave of interest in material culture and the world of things How should we understand the force and figure of that wave as it shapes different disciplines *Other Things* explores this question by considering a wide assortment of objects from beach glass to cell phones sneakers to skyscrapers that have fascinated a range of writers and artists including Virginia Woolf Man Ray Spike Lee and Don DeLillo The book ranges across the literary visual and plastic arts to depict the curious lives of things Beginning with Achilles's Shield then tracking the object/thing distinction as it appears in the work of Martin Heidegger and Jacques Lacan Bill Brown ultimately focuses on the thingness disclosed by specific literary and artistic works Combining history and literature criticism and theory *Other Things* provides a new way of understanding the inanimate object world and the place of the human within it encouraging us to think anew about what we mean by materiality itself

The Architecture of Aftermath Terry E. Smith, 2006 Publisher description

The New-York Journal of American History, 2003

The Iconic Building Charles Jencks, 2005 A new type of architecture has emerged in the last decade the iconic landmark building which challenges the traditional architectural monument In the past public buildings expressed shared meaning through well known conventions Today those conventions are superseded by commercial forces and the quest for instant fame Public architecture is now required to be an amazing piece of surreal sculpture as well as something that appeals to a diverse audience at once provocative and practical yet without the context that religion and ideology once provided Such contrary demands drive the architect toward a new convention the enigmatic signifier This curious sign suggests many meanings without naming of them The most publicized version of the genre Frank Gehry's New Guggenheim Museum in Bilbao 1997 became an instant media event that forces other architects to design event buildings routinely This Bilbao effect has led to a series of landmark buildings by architects such as Norman Foster Peter Eisenman Enric Miralles Zaha Hadid Daniel Libeskind Renzo Piano Will Alsop and Rem Koolhaas Some of these buildings are successful creations while others make us wince book jacket
