**Unconscious Incarnations** Brian W. Becker, John Panteleimon Manoussakis, David M. Goodman, 2018-04-27 Unconscious Incarnations considers the status of the body in psychoanalytic theory and practice bringing Freud and Lacan into conversation with continental philosophy to explore the heterogeneity of embodied life By doing so the body is no longer merely an object of scientific inquiry but also a lived body a source of excessive intuition and affectivity and a raw animality distinct from mere materiality The contributors to this volume consist of philosophers psychoanalytic scholars and practitioners whose interdisciplinary explorations reformulate traditional psychoanalytic concepts such as trauma healing desire subjectivity and the unconscious Collectively they build toward the conclusion that phenomenologies of embodiment move psychoanalytic theory and practice away from representationalist models and toward an incarnational approach to psychic life Under such a carnal horizon trauma manifests as wounds and scars therapy as touch subjectivity as bodily boundedness and the unconscious real as an excessive remainder of flesh Unconscious incarnations signal events where the unsignifiable appears among signifiers the invisible within the visible and absence within presence In sum where the flesh becomes word and the word retains its flesh Unconscious Incarnations seeks to evoke this incarnational approach in order to break through tacit taboos toward the body in psychology and psychoanalysis This interdisciplinary work will appeal greatly to psychoanalysts and psychoanalytic psychotherapists as well as philosophy scholars and clinical psychologists
