A Prehistory of Western North America David Leedom Shaul, 2014-06-30 This book offers a new approach to the use of linguistic data to reconstruct prehistory The author shows how a well studied language family in this case Uto Aztecan can be used as an instrument for reconstructing prehistory The main focus of Shaul s work is the mapping of Uto Aztecan By presenting various models of Uto Aztecan prehistory by assessing multiple models simultaneously and by guiding readers through areas where the evidence is not so clear Shaul helps nonspecialists develop the tools needed for evaluating various historical linguistics models themselves He evaluates both archaeological and genetic evidence as well placing it carefully alongside the linguistic evidence he knows best Shaul s thorough treatment provides many new avenues for future research on the historical anthropology of western North America

Language Contact and Change in Mesoamerica and Beyond Karen Dakin, Claudia Parodi, Natalie Operstein, 2017-06-30

Language contact phenomena in Mesoamerica and adjacent regions present an exciting field for research that has the potential to significantly contribute to our understanding of language contact and the role that it plays in language change. This volume presents and analyzes fresh empirical data from living and or extinct Mesoamerican languages from the Mayan Uto Aztecan Totonac Tepehuan and Otomanguan groups neighboring non Mesoamerican languages Apachean Arawakan Andean languages as well as Spanish. Language contact effects in these diverse languages and language groups are typically analyzed by different subfields of linguistics that do not necessarily interact with one another. It is hoped that this volume which contains works from different scholarly traditions that represent a variety of approaches to the study of language contact will contribute to the lessening of this compartmentalization. The volume is relevant to researchers of language contact and contact induced change and to anyone interested both in the historical development and present features of indigenous languages of the Americas and Latin American Spanish.

Hinterlands to Cities Matthew C. Pailles, Michael T. Searcy, 2022-03-14. This approachable book in the SAA Press Current Perspectives Series is a comprehensive synthesis of Northwest Mexico from the US border to the Mesoamerican frontier. Filling a vital gap in the regional literature it serves as an essential reference not only for those interested in the specific history of this area of Mexico but western North America writ large. A period by period review of approximately 14 000 years reveals the dynamic connections that knitted together societies inhabiting the Sea of Cortez coast the Sonoran and Chihuahuan Deserts and the Sierra Madre Occidental. Networks of interaction spanned these diverse ecological topographical and cultural terrains in the millennia following the demise of the megafauna. The authors provide a fresh perspective that refutes depictions of the Northwest as a simple filter or conduit of happenings to the north or south and they highlight the role local motivations and dynamics played in facilitating continental scale processes.

Iconicity of the Uto-Aztecs Tirtha Prasad Mukhopadhyay, Alan Philip Garfinkel, 2023-05-12. Uto Aztecan iconic practices are primarily conditioned by the consciousness of the snake as a death dealing power and as such an animal that displays the deepest fears and anxieties of the individual. The attempt to study a snake simulacrum thus constitutes the basic objective of this volume. A long all embracing iconicity of snakes and related snake motifs are evident in different cultural expressions ranging from rock art templates to other cultural artifacts like basketry pottery temple architecture and sculptural motifs. Uto Aztecan iconography demonstrates a symbolic memorial order of emotional valences as well as the negotiations with death and a belief in rebirth just as the skin shedding snake reptile manifests in its life cycle.

Nahuatl Nations Magnus Pharao Hansen,2024-08-09 Nahuatl Nations is a linguistic ethnography that explores the political relations between those Indigenous communities of Mexico that speak the Nahuatl language and the Mexican Nation that claims it as an important national symbol Author Magnus Pharao Hansen studies how this relation has been shaped by history and how it plays out today in Indigenous Nahua towns regions and educational institutions and in the Mexican diaspora He argues that Indigenous languages are likely to remain vital as long as they used as languages of political community and they also protect the community s sovereignty by functioning as a barrier that restricts access to the participation for outsiders Semiotic sovereignty therefore becomes a key concept for understanding how Indigenous communities can maintain both their political and linguistic vitality While the Mexican Nation seeks to expropriate Indigenous semiotic resources in order to improve its brand on an international marketplace Indigenous communities may employ them in resistance to state domination

to linguistic problems to help reveal language groups and to model the evolution and competition of languages in space and time. Illustrated with a series of case studies and worked examples, it presents an interdisciplinary framework to enable researchers from the mathematical, physical, and social sciences to collaborate on linguistic problems. It demonstrates the complexity of linguistic databases and provides a mathematical toolkit for analyzing and extracting useful information from them, helping to conceptualize empirical facts better than a mere ethnographic view.
