future of Iowa In doing so she ties all of Iowa's natural features into one comprehensive whole Since so much of the tallgrass state has been transformed into an agricultural landscape Mutel focuses on understanding today's natural environment by understanding yesterday's changes After summarizing the geological archaeological and ecological features that shaped Iowa's modern landscape she recreates the once wild native communities that existed prior to Euroamerican settlement Next she examines the dramatic changes that overtook native plant and animal communities as Iowa's prairies woodlands and wetlands were transformed Finally she presents realistic techniques for restoring native species and ecological processes as well as a broad variety of ways in which Iowans can reconnect with the natural world Throughout in addition to the many illustrations commissioned for this book she offers careful scientific exposition a strong sense of respect for the land and encouragement to protect the future by learning from the past The emerald prairie that gleamed and shone to the horizon's edge as botanist Thomas Macbride described it in 1895 has vanished Cornelia Mutel's passionate dedication to restoring this damaged landscape and by extension the transformed landscape of the entire Corn Belt invigorates her blend of natural history and human history Believing that citizens who are knowledgeable about native species communities and ecological processes will better care for them she gives us hope and sound suggestions for the future *Tending Iowa's Land* Cornelia F. Dean M Roosa,Jon W. Stravers,Bruce Ehresman,Rich Patterson,2013-05 This long awaited collection of James Landenberger s paintings of Iowa birds of prey presents thirty two full page full color species from the common turkey vulture to the red shouldered hawk of Mississippi River woodlands to the little northern saw whet owl Four naturalists who have devoted their lives to conserving wilderness habitats and species have written essays to complement the paintings Thanks to state and federal laws and a shift in public attitude birds of prey are no longer seen as incarnations of ferocity but as creatures superbly attuned to their lives and surroundings Although Iowa unfortunately leads the way in the amount of wildlife habitat that has been destroyed conservation organizations and state agencies have also led the way toward successful raptor restoration projects among them a roadside nest box program for the American kestrel a project to restore peregrine falcons to their historic eyries and a relocation program that should ensure a sustainable population of ospreys The recent spectacular recovery of the bald eagle whose nests had vanished from the state for seventy years is particularly encouraging There can be no substitute for seeing thousands of broad winged hawks soaring high overhead during migration a great horned owl perching in silhouette at dusk or a Cooper s hawk plunging toward its prey along the roadside But Jim Landenberger s meticulously detailed paintings go a long way toward conveying the remarkable beauty of the American kestrel and other falcons the grace of the swallow tailed kite the immaculate mystery of the snowy owl and its fellow owls the glistening head feathers of an adult bald eagle and the piercing defiance so characteristic of our larger hawks
